2.2 On May 7, 2021 Commissioners Report \#2021-INFO-51 reported semi-annual population and household estimates.

## 3. Historical population and household estimates (2016-2021)

a. housing production estimates provided by the area municipalities;
b. an analysis of past trends; and
c. estimates of the timing and anticipated annual housing occupancy across the Region.
4.2 The forecasts make no allowances for unpredictable factors such as changes in economic conditions affecting residential growth (e.g. significant increases in mortgage rates, building trade strikes, etc.).

[^0]4.3 The short-term forecasts indicate that in the next five years Durham's population is projected to increase from 713,680 (2021) to 805,200 in 2026 (refer to Attachment 3). The population growth for the five-year period from May 2021 to May 2026 is expected to be $12.8 \%$.

4.5 These forecasts recognise an increased rate of growth in Pickering towards the end of the period, adding approximately 4,250 households and 11,700 people to the forecast as the Seaton community continues to develop.
