

Population at a Glance

HEALTH
DEPARTMENT

Last Updated: September 2019

Highlights

- The estimated population in Durham Region in 2018 was 683,600.
- The largest municipality in Durham Region is Oshawa with an estimated population of 169,500 in 2018.
- The Durham Region population increased by 13 per cent between 2008 and 2018, greater than the increase in Ontario of 11 per cent.
- Ajax had the largest population growth in Durham Region between 2008 and 2018, with an increase of 22 per cent, followed by Clarington (18 per cent), Oshawa (14 per cent), and Whitby (12 per cent).
- Scugog had a population decrease between 2008 and 2018 of one per cent.
- The aging of the population is apparent with growth occurring in ages 55 and older. In particular, seniors 90 years and older had the highest population growth in Durham Region with an overall increase of 114 per cent. The largest increase occurred in Pickering where the population of seniors 90 and older almost tripled, going from just over 250 in 2008 to over 630 in 2018.
- The age groups with the largest decrease in population in Durham Region between 2008 and 2018 were adults 45 to 49 years (16 per cent decrease) and adults 40 to 44 years (12 per cent decrease).
- Changes in the population of children four years and under varied across Durham Region municipalities. The largest increase occurred in Clarington where the population grew by 25 per cent between 2008 and 2018, followed by Oshawa with an increase of 20 per cent. Whitby, Scugog, and Uxbridge all experienced a drop in the number of young children over the same 10-year period.
- The proportion of adult males and females 55 years and older increased between 2008 and 2018 in Ontario, Durham Region and all municipalities.
- The populations of Ontario, Durham Region and most municipalities have steadily increased since 1989.
- There are slightly more females than males in Ontario, Durham Region and all municipalities.

For more detailed, topic specific reports that include population data please go to the [Health Statistics in Durham Region webpage](#).

Introduction

Population at a Glance provides selected population indicators for Durham Region and its eight municipalities (Pickering, Ajax, Whitby, Oshawa, Clarington, Scugog, Uxbridge and Brock), and Ontario. This report includes population indicators relevant to public health programming, as outlined in the Ontario Public Health Standards (OPHS). The Ontario Ministry of Health and Long-Term Care published the OPHS in 2018 under the authority of section 7 of the *Health Protection and Promotion Act*.

The Demography Division of Statistics Canada produces population estimates by single year of age (to 90 plus) and sex as of July 1 each year. They extrapolate the population estimates from the most recent Census year forward using actual data on births, deaths and migration and base them on adjusted census counts. Statistics Canada does not generally create adjustments for net undercoverage until two to three years post census. Therefore, for census years, such as 2016, we often have two sources of population data, the actual census counts, and the estimated population extrapolated from the previous census. In most cases, the estimated population better represents the true population. Statistics Canada produces new estimates when they complete the adjustments for undercoverage. The Ontario Ministry of Health distributes Statistics Canada's population estimates to public health units.

This report includes charts or tables for Ontario, Durham Region, Pickering, Ajax, Whitby, Oshawa, Clarington, Scugog, Uxbridge and Brock for the following indicators:

- Per cent Male & Female Population by Age Group (for the most recent year available with comparison to 10 years previous)
- Population Counts by Age Group & Sex (includes most recent year available, 10 years previous and per cent change)
- Population Counts by Year & Sex

The report includes summary tables with information for all geographical areas for the following indicators:

- Male Population by Age Group, 2018
- Female Population by Age Group, 2018
- Total Population by Age Group, 2018
- Percentage Change in Total Population by Age Group, 2008 to 2018
- Total Population by Year, 1989 to 2018

For more information or if you require this information in an accessible format, please contact Durham Health Connection Line at 905-666-6241 or 1-800-841-2729.

Summary Tables for Selected Population Indicators

The 50 to 54 or 55 to 59 age group is the largest age group for males in Durham Region and the municipalities except for Ajax, where the 20 to 24 age group is largest, which is also the largest age group in Ontario. Oshawa has the largest male population in all age groups except for children 10 to 14 years, which is largest in Whitby. Brock has the smallest male population in all age groups.

Durham Region had higher overall population growth between 2008 and 2018 than Ontario (13 per cent and 11 per cent respectively). Population growth was highest in Durham Region seniors 90 years and older. Populations decreased among children aged 10 to 19 years and among adults 40 to 49 years. Overall population growth was highest in Ajax (21 per cent) and lowest in Brock (4 per cent) while Scugog experienced a one per cent drop in population size in the same period.

Durham Region has almost doubled its population since 1989. The population of Ajax has almost tripled in this period.

Figure 1: Total Population by Year, Durham Region Municipalities, 1989 to 2018

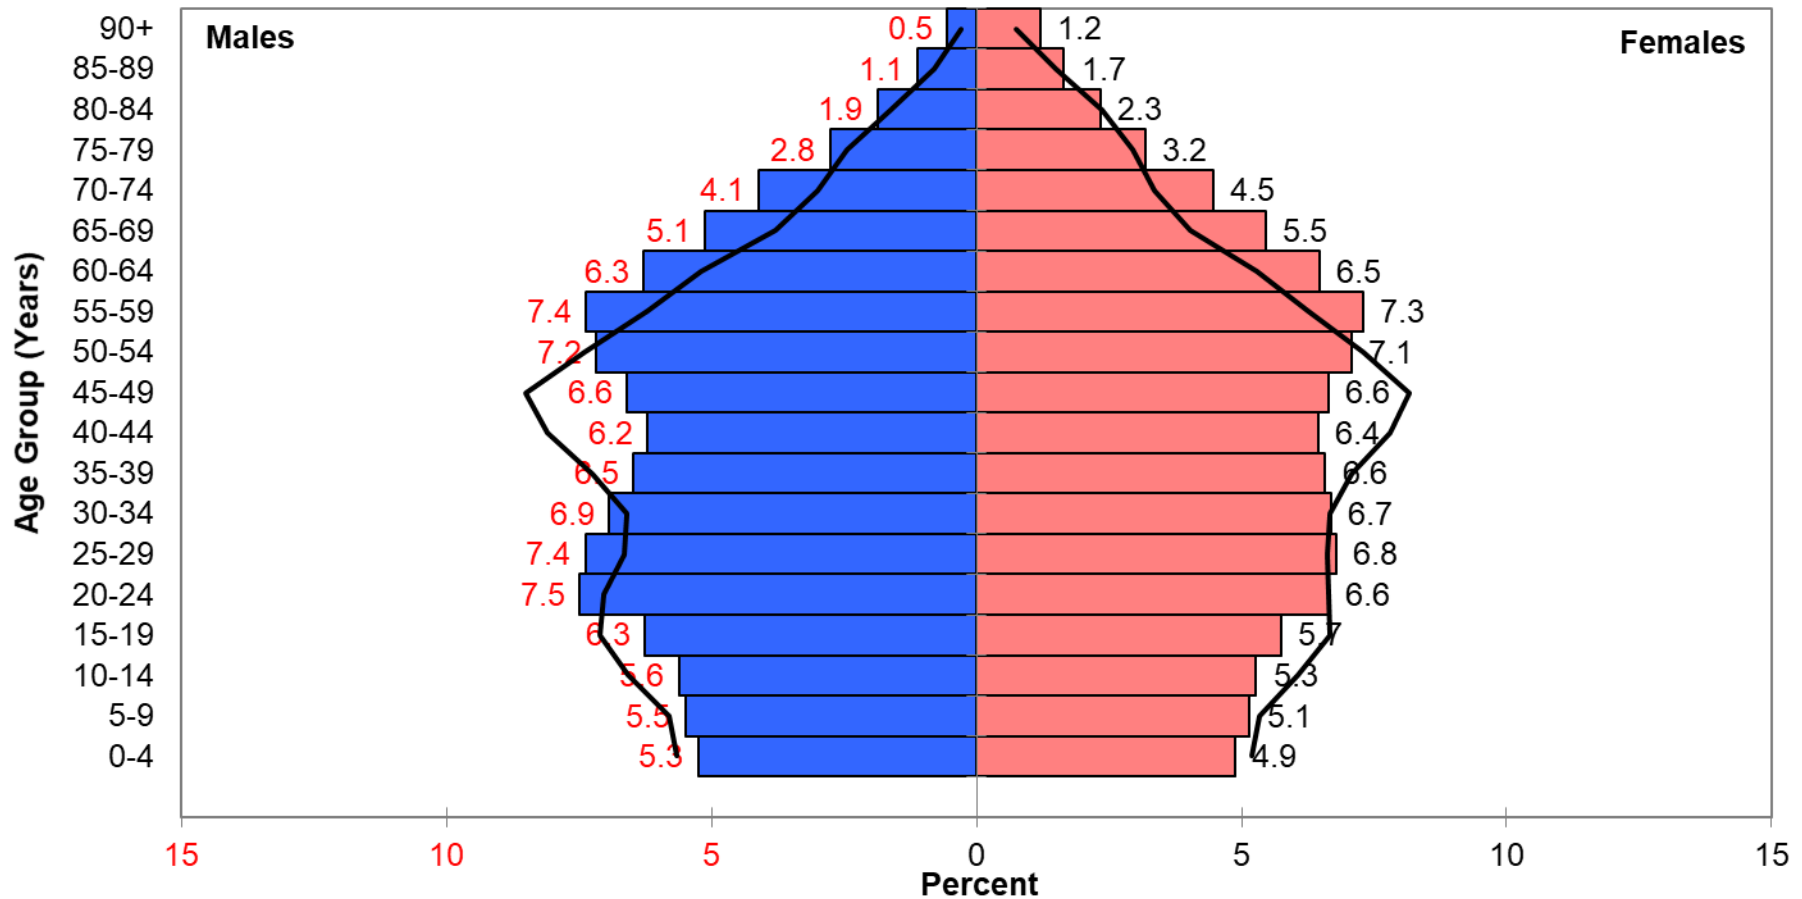

Source: Ontario Population Estimates (1989-2019), Ontario Ministry of Health

Oshawa has the largest population in Durham Region and Brock has the smallest. Whitby and Ajax showed the greatest increases in population between 1989 and 2018.

Ontario Population

Figure 2: Male and Female Population by Age Group, Ontario, 2008 & 2018 *

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

*Bars refer to 2018 and lines refer to 2008

Males aged 20 to 24 years made up the largest share of the Ontario male population in 2018 (7.5 per cent) and females aged 55 to 59 made up the largest share of the female population (7.3 per cent). The proportion of adult males and females 55 years and older increased between 2008 and 2018 as did young adults 20 to 29 whereas the proportion of children 19 years and younger has decreased along with the proportion of adults 35 to 49 years.

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

The Durham Region population grew by 13 per cent between 2008 and 2018 with similar growth in females and males. Like Ontario, the largest increase in population was among Durham Region seniors 90 years and older while the population of both children 10 to 19 years and adults 40 to 49 years decreased.

Figure 5: Population Counts by Year & Sex, Durham Region, 1989 to 2018

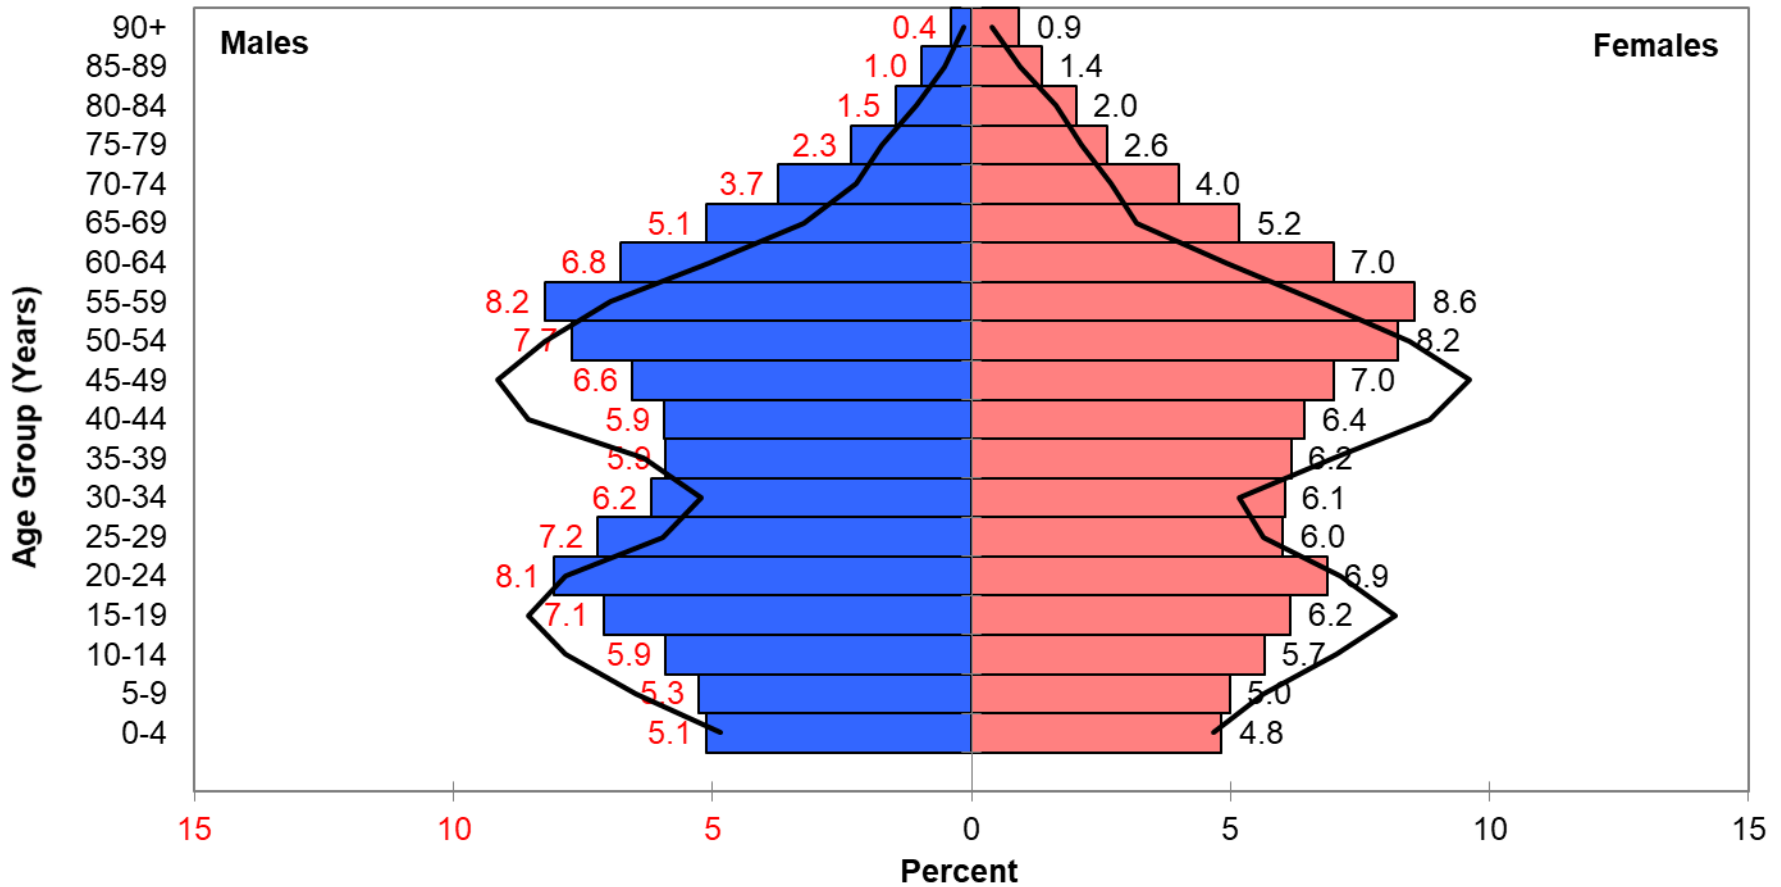

Source: Ontario Population Estimates (1989-2018), Ontario Ministry of Health

The Durham Region population has steadily increased since 1989. Between 1989 and 1994, the number of females and males was similar. Since 1995, the gap has gradually increased with slightly more females than males in Durham Region.

Pickering Population

Figure 6: Male and Female Population by Age Group, Pickering, 2008 & 2018 *

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

*Bars refer to 2018 and lines refer to 2008

Males and females aged 55 to 59 years made up the largest share of the Pickering population in 2018 (8.2 per cent of males and 8.6 per cent of females). The proportion of adults 55 years and older increased between 2008 and 2018 as did younger adults aged 25 to 34. In contrast, the proportion of children 5 to 19 years decreased along with the proportion of adults aged 35 to 49.

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

The Pickering population grew by 6 per cent between 2008 and 2018 with similar growth in females and males. The largest increase in population was among Pickering seniors 90 years and older while the population of both children 5 to 19 years and adults 40 to 49 years decreased.

Figure 7: Population Counts by Year & Sex, Pickering, 1989 to 2018

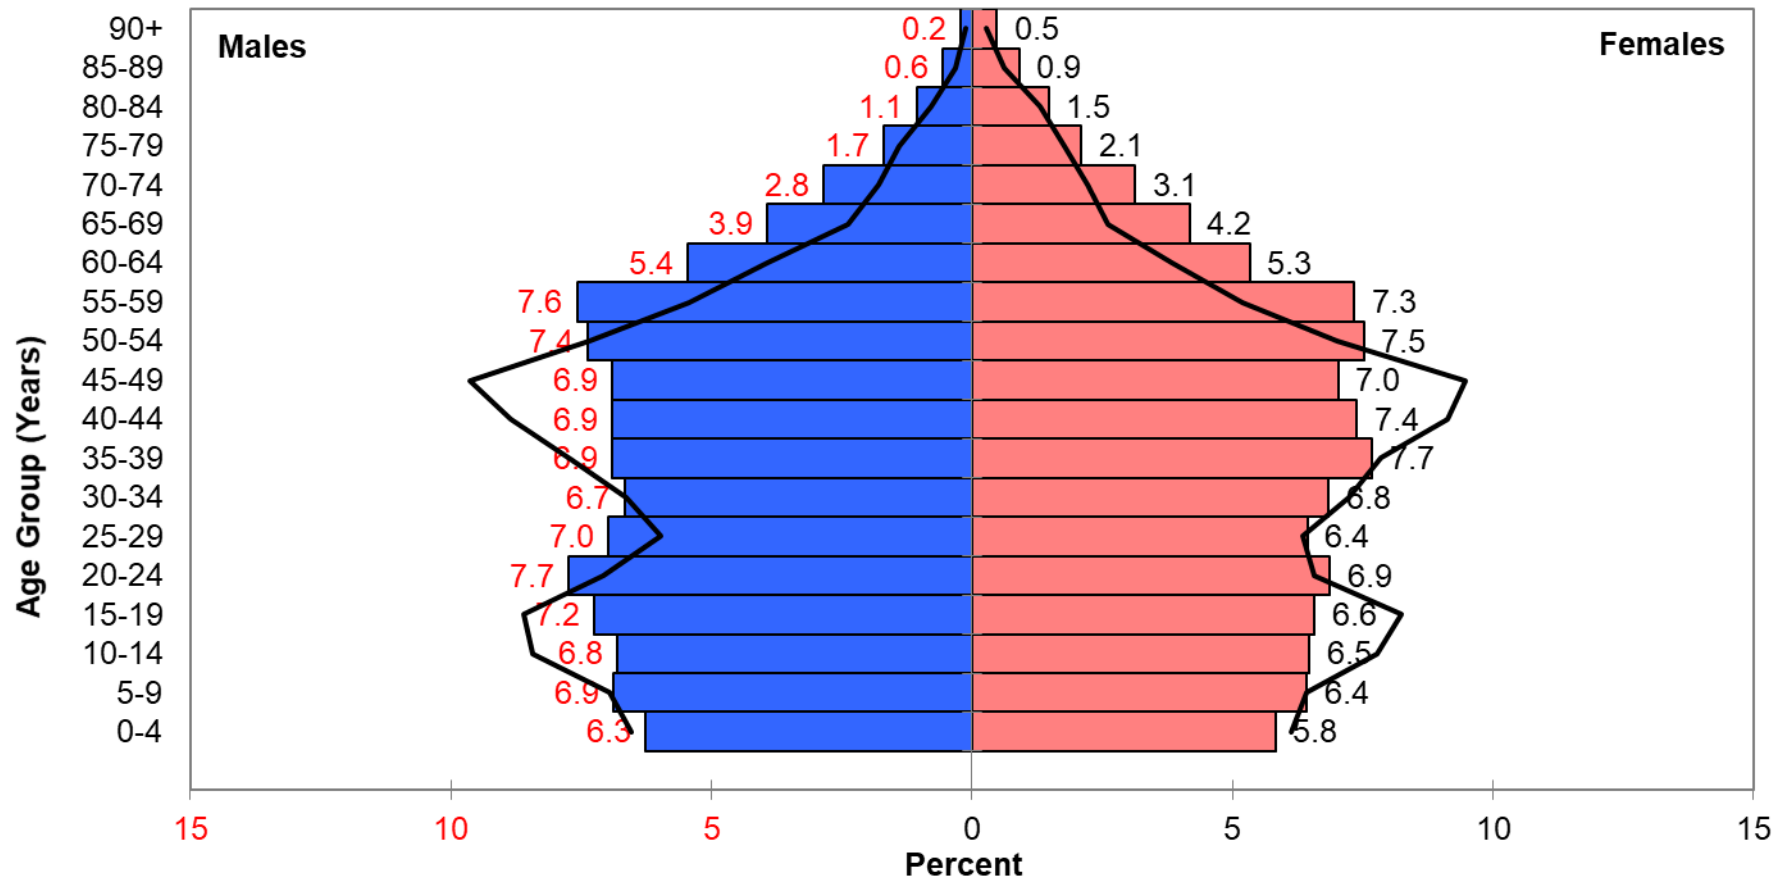

Source: Ontario Population Estimates (1989-2018), Ontario Ministry of Health

The Pickering population increased between 1989 and 2001, remained stable between 2002 and 2010, and increased again between 2012 and 2018. Between 1989 and 1990 there were slightly more males than females. Between 1991 and 1995, the number of females and males was similar. Since 1996 the pattern switched and there have been slightly more females than males in Pickering.

Ajax Population

Figure 8: Male and Female Population by Age Group, Ajax, 2008 & 2018 *

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

*Bars refer to 2018 and lines refer to 2008

Males aged 20 to 24 years made up the largest share of the Ajax male population in 2018 (7.7 per cent) and females aged 35 to 39 years made up the largest share of the Ajax female population (7.7 per cent). The proportion of adult males and females 55 years and older increased between 2008 and 2018, as did young adult males 20 to 29. The proportion of children four years and under and youth 10 to 19 years decreased along with the proportion of adults 40 to 49 years.

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

The Ajax population grew by 22 per cent between 2008 and 2018 with similar growth in females and males. The largest increase in population was among Ajax seniors 90 years and older although the largest increase overall was in Ajax males 85 to 89 (121 per cent growth). The population of Ajax adults 40 to 49 years decreased.

Figure 9: Population Counts by Year & Sex, Ajax, 1989 to 2018

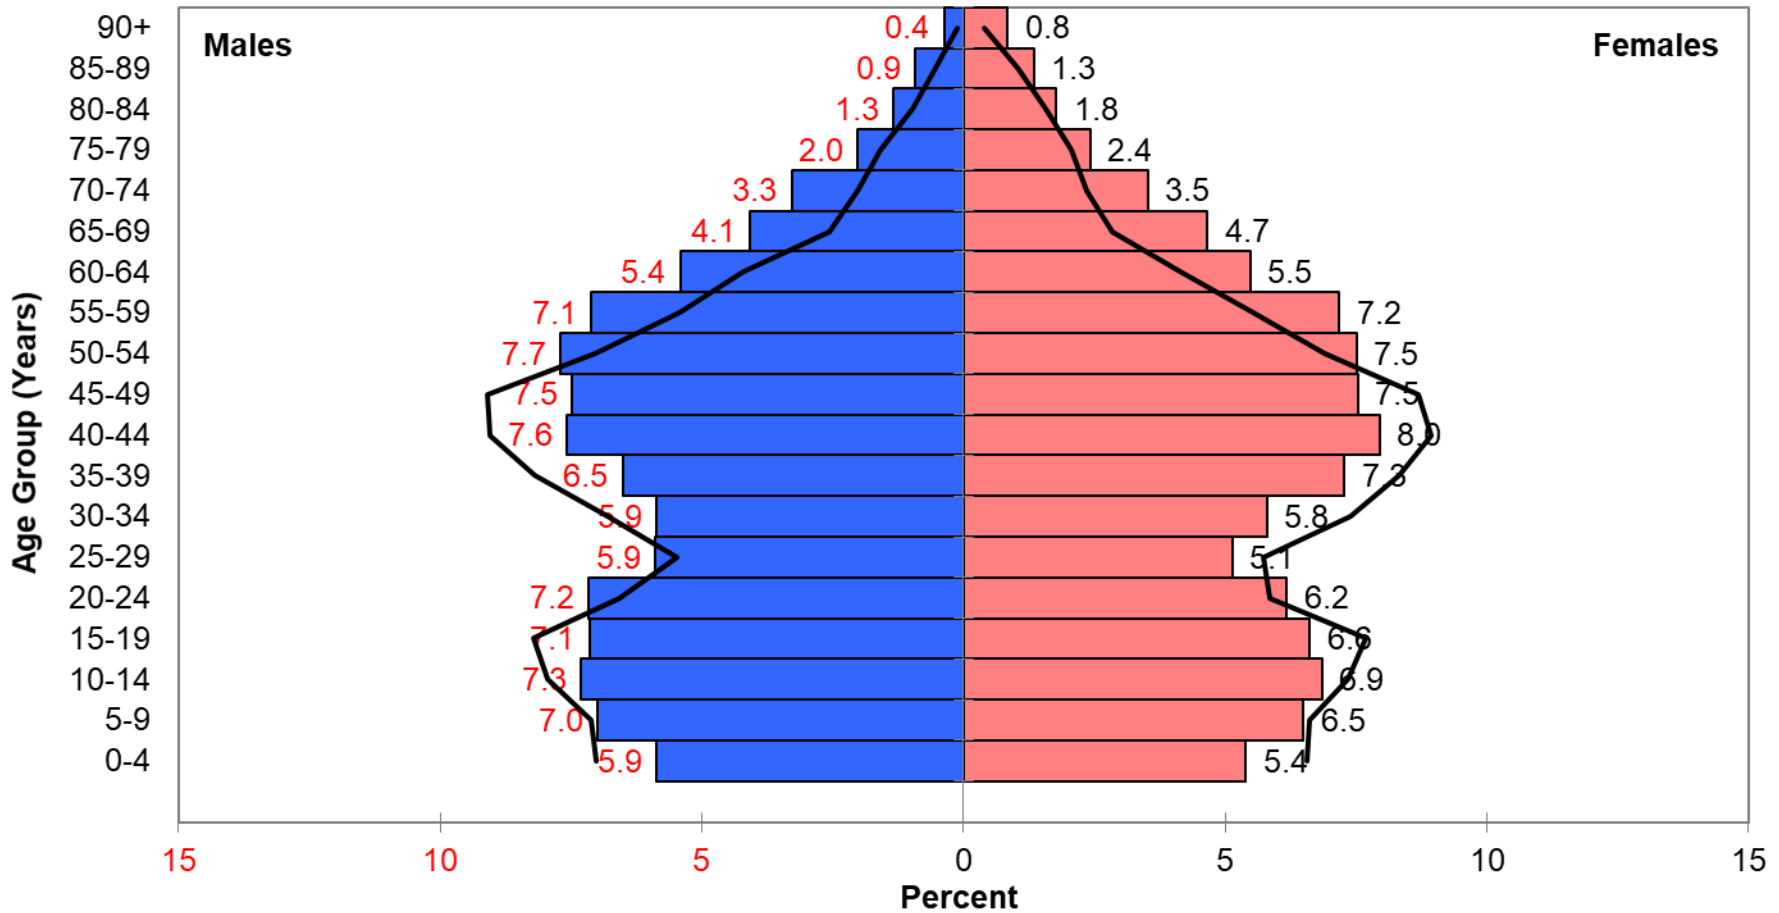

Source: Ontario Population Estimates (1989-2018), Ontario Ministry of Health

The Ajax population has steadily increased since 1989. Between 1989 and 1994, the numbers of females and males was similar. Since 1995, the gap has gradually increased with slightly more females than males in Ajax.

Whitby Population

Figure 10: Male and Female Population by Age Group, Whitby, 2008 & 2018 *

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

*Bars refer to 2018 and lines refer to 2008

Males aged 50 to 54 years made up the largest share of the Whitby male population in 2018 (7.7 per cent) while females 40 to 44 made up the largest share of the female population (8.0 per cent). The proportion of adults 50 years and older increased between 2008 and 2018 as did the proportion of younger adults 20 to 24 years. In contrast, the proportion of children 19 years and younger has decreased along with the proportion of adults 30 to 49 years.

The Scugog population decreased by one per cent between 2008 and 2018. The Scugog population 55 years and older increased in this period and the largest increase was among Scugog seniors 90 years and older. The population of both children 19 years and younger and adults 35 to 54 years decreased.

Figure 17: Population Counts by Year & Sex, Scugog, 1989 to 2018

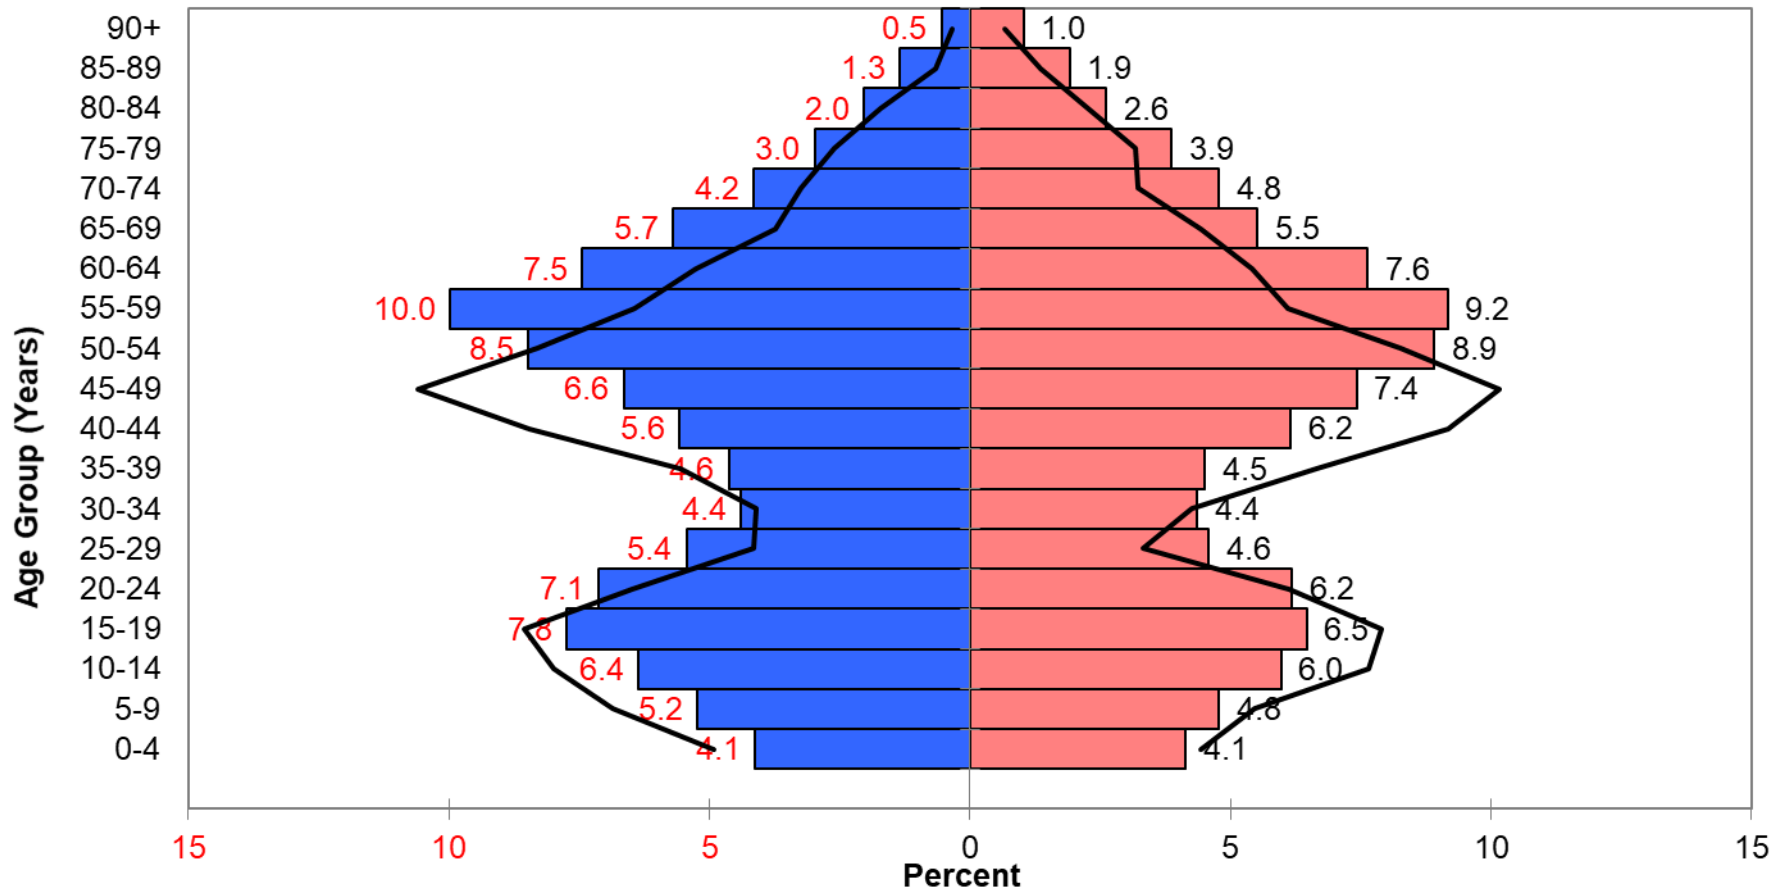

Source: Ontario Population Estimates (1989-2018), Ontario Ministry of Health

The Scugog population increased between 1989 and 2007 and has remained relatively stable since. The number of females and males in Scugog has been similar since 1989.

Uxbridge Population

Figure 18: Male and Female Population by Age Group, Uxbridge, 2008 & 2018 *

Source: Ontario Population Estimates (2008-2018), Ontario Ministry of Health

*Bars refer to 2018 and lines refer to 2008

Males and females aged 55 to 59 years made up the largest share of the Uxbridge population in 2019 (10.0 per cent of males and 9.2 per cent of females). The proportion of adults 55 years and older increased between 2008 and 2018 as did the proportion of younger adults 25 to 29 years. In contrast, the proportion of children 19 years and younger decreased along with the proportion of adults 35 to 49 years.
