Police-reported domestic incidents rate with children present (2011-2015)

What You Need to Know

- A lower rate of incidents with children present is better for health.
- The rate ranges by Health Neighbourhood from 1.1 to 15.5 per 10,000 population.
- Rates are highest in four of the seven Priority Neighbourhoods, particularly Downtown Oshawa and Lakeview, along with some Neighbourhoods in Ajax and Pickering. Rates are lowest in Whitby and Clarington. The rates likely underestimate the extent of the problem because people may not report domestic incidents to the police.

Indicator Notes

- This indicator measures the number of police-reported domestic incidents with children physically present during the incident, per 10,000 population.
- Source: Durham Region Police Service, Durham Region 2011-2015, Incident-based Uniform Crime Reporting (UCR) Survey, Accessed September 2016.
- Incident-based reporting provides one record for each incident although each could include multiple offences, victims, offenders and charges. Police could be called to a specific household multiple times with each counted as an incident. Domestic means that intimate partners are involved. Intergenerational incidents such as child or elder abuse that do not also include intimate partners are not included in this indicator. The reporting officer flags incidents when children are physically present. Children are persons less than 18 years old. This indicator is a subset of the domestic incidents indicator. Incidents are geocoded to the location or residence of the incident.
- Witnessing family violence is as harmful as experiencing it directly. Children see or hear approximately 40% to 80% of family violence happening within their home. The lasting impact of witnessing family violence can include physical harm, and short and long-term emotional, behavioural and developmental problems, including post-traumatic stress disorder. For more information from the Public Health Agency of Canada, see [The Effects of Domestic Violence on Children - Where does it Hurt?](#)
- We sorted Neighbourhoods by the incident rate and divided them into quintiles (five equal groupings) based on the total number of incidents in those Neighbourhoods.
- We compared Neighbourhoods with Durham Region based on their confidence intervals. Those with rates that were lower or higher had 95% confidence intervals that did not overlap with those of Durham Region and were significantly different.
- Priority Neighbourhoods are communities that require focus to build on health and well-being. The Priority Neighbourhoods are: 1) Downtown Ajax – Ajax, 2) Downtown Whitby – Whitby, 3) Lakeview – Oshawa, 4) Gibb West – Oshawa, 5) Downtown Oshawa – Oshawa, 6) Central Park – Oshawa, 7) Beatrice North – Oshawa.
