Source: Kindergarten Parent Survey (KPS), 2012, Durham Region.

Note: Lower (down arrow) or Higher (up arrow) means that the 95% confidence intervals do not overlap and that the rates are different from Durham Region. Estimates marked with an asterisk should be used with caution due to small sample sizes and those marked "NR" are non-releaseable due to small numbers.

Senior Kindergarten Children in Excellent or Very Good Health (2012)

Table 2: List of Health Neighbourhoods ranked from lowest to highest

Order	Health Neighbourhoods	Percentage of Senior Kindergarten Children	Compared to Durham Region (Higher is Better)	Quintile
1	Lakeview (O1)	73%	LOWER	1

Senior Kindergarten Children in Excellent or Very Good Health (2012)

Table 3: Senior kindergarten (SK) children whose parents rated their health as excellent or very good by Durham Region Municipality

Municipality	Percentage	Compared to Durham Region (Higher is Better)
Pickering	92.9%	similar
Ajax	90.0%	similar
Whitby	93.7%	similar
Oshawa	89.6%	similar
Clarington	93.4%	similar
Scugog	94.3%	similar
Uxbridge	96.3%	similar
Brock	Not Releasable	Not Releasable
Durham Region	92.2%	Higher than Ontario
Ontario	88.2%	

What You Need to Know

- A higher percentage is better for health.
- The percentage ranges by Health Neighbourhood from 73.5% to 100%.
- Rates are lowest in Oshawa Neighbourhoods. In general, the health of SK children is rated very positively in Durham Region.

Indicator Notes

- Percentage of SK children whose parents rated their child's health as excellent or very good.
- Source: Kindergarten Parent Survey (KPS), 2012, Durham Region.
- The KPS is a questionnaire for parents of SK children that complements the Early Development Instrument (EDI) by collecting information about the family and the child's experiences before entering kindergarten. In Durham Region, the KPS was completed by 2,704 parents, representing a 40% response rate among parents of SK children attending publicly funded schools in Durham Region in spring 2012. A total of 2,696 surveys were coded to a Health Neighbourhood.
- Estimates marked with an asterisk should be used with caution due to small sample sizes (denominator of between 11 and 29 surveys or a coefficient of variation of 16.7% to 33.3%). Non-releasable estimates have fewer than 11 responses or a coefficient of variation greater than 33.3%.
- KPS question: "In general, would you say your child's health is: Excellent, Very Good, Good, Fair, Poor". This indicator combines the "Excellent" and "Very Good" categories.
- Neighbourhoods were sorted into five groupings (quintiles) based on the percentage of children with excellent or very good health. Approximately 10 Neighbourhoods are in each quintile.
- Neighbourhoods were compared with Durham Region based on their confidence intervals. Those with rates that were lower or higher had 95% confidence intervals that did not overlap with those of Durham Region and were significantly different.
- For more information about KPS and EDI results in Durham Region, see Child Care and Children's Programs at durham.ca. For more information about the KPS provincially, see [Offord Centre](#).

Release Date: January 2015.
