## Aboriginal Population (2011)

Table 3: Percentage of Aboriginal persons by Durham Regional Municipality

Municipality	Percentage	Compared to Durham Region
Pickering	1.0%	<b>LOWER</b>
Ajax	1.0%	<b>LOWER</b>
Whitby	1.2%	similar
Oshawa	2.0%	<b>HIGHER</b>
Clarington	2.0%	<b>HIGHER</b>
Scugog	1.8%	<b>HIGHER</b>
Uxbridge	1.1%	<b>LOWER</b>
Brock	2.4%	<b>HIGHER</b>
Durham Region	1.5%	Lower than Ontario
Ontario	2.4%	

### What you need to know

- This indicator is classified as neutral in terms of health.
- The percentage of Aboriginal persons ranges by Health Neighbourhood from 0.4% to 3.4%.
- Neighbourhoods with higher percentages of Aboriginal persons are in the eastern half of Durham Region in Oshawa, Clarington, Scugog and Brock, particularly the Neighbourhoods of Downtown Oshawa, Central Park, Courtice South, Brock and Port Perry.

### Indicator Notes

- This indicator measures the percentage of the population that reported identifying with the Aboriginal peoples of Canada.
- Source: National Household Survey (NHS) 2011, Statistics Canada.
- Refers to whether the person reported identifying with the Aboriginal peoples of Canada. This includes those who reported being an Aboriginal person (First Nations, Métis or Inuit), and/or those who reported Registered or Treaty Indian status, and/or those who reported membership in a First Nation or Indian band. Aboriginal peoples of Canada are defined in the Constitution Act, 1982, Section 35(2) as including the Indian, Inuit, and Métis peoples of Canada. See: [National Household Survey Dictionary, 2011](#).
- The NHS replaced the long-form Census in 2011. As a voluntary survey, the NHS has more non-response bias than a census so there is a risk that the results are not representative of the actual population, especially in smaller areas or population groups.
- Statistics Canada uses the global non-response rate (GNR) to assess the quality of the NHS estimates for various geographies. NHS estimates for any area with a GNR greater than or equal to 50% have a high level of error and should not be released.
- The GNR ranges by Health Neighbourhood from 19.3% to 46.9%. In general, rural areas tend to have a higher GNR.
- Neighbourhoods were sorted into five groupings (quintiles) based on the percentage of Aboriginal persons. Approximately 10 Neighbourhoods are in each quintile.
- Lower refers to at least 20% lower than Durham Region. Higher refers to at least 20% higher.

Release Date: February 2016.
