Population counts from the 2011 Census differed from Ministry of Finance 2011 estimates that are commonly used by the Health Department. As a result, counts and rates for Durham Region and the municipalities may vary from those presented in other Health Department reports. This map has been produced from a variety of sources. The Region of Durham does not make any representations concerning the accuracy, likely results, or reliability of the use of the materials. The Region hereby disclaims all representations and warranties.

What You Need to Know

- The population aged 30-39 ranges by Health Neighbourhood from 7.0% to 24.4%.
- The mix of age groups impacts the health and general characteristics of the Neighbourhood.
- The Neighbourhoods with a high percentage of the population aged 30-39 are generally the same as those with a high percentage of young children. These are the Neighbourhoods where young families predominate, affecting the health and general characteristics of the Neighbourhood.

Indicator Notes

- The percentage aged 30-39 is calculated by dividing the number of people aged 30-39 years by the total population, multiplied by 100.
- Source: 2011 Census, Statistics Canada.
- Population counts from the 2011 Census differed from the Statistics Canada 2011 estimates that are commonly used by the Health Department, which are adjusted for undercounts. As a result, counts and rates for Durham Region and the municipalities may vary from those presented in other Health Department reports.
- Neighbourhoods were sorted into quintiles (5 groupings) based on the number of people in that specific age group, i.e., quintiled by population count. This means that approximately 20% of those aged 30-39 in Durham Region are in each quintile.
- Lower refers to at least 20% lower than the Durham Region percentage. Higher refers to at least 20% higher.
