Low Income Rate (2011)

Table 3: Percentage in Low Income Households by Durham Region Municipality

Municipality	Percentage	Compared to Durham Region (Lower is Better)
Pickering	9%	similar
Ajax	9%	similar
Whitby	9%	similar
Oshawa	14%	HIGHER
Clarington	8%	LOWER
Scugog	6%	LOWER
Uxbridge	6%	LOWER
Brock	13%	HIGHER
Durham Region	10%	Lower than Ontario
Ontario	14%	

What You Need to Know

- A lower percentage of low income is better for health.
- The low income rate ranges by Health Neighbourhood from 4.2% to 28.1%.
- Low income rates are generally associated with poorer health outcomes. Low income levels tend to be higher in Neighbourhoods in downtown areas and south central Oshawa, and Brock, as well as the specific Neighbourhoods of Applecroft, Beatrice North and Oshawa Northwest.

Indicator Notes

- This indicator measures the percentage of people who live in low income households as determined by the low-income measure after tax (LIM-AT). Low income households are those with a combined after tax household income below the cut-off set at 50% of the median for the Canadian population.
- Source: National Household Survey (NHS) 2011, Statistics Canada.
- The NHS replaced the long-form Census in 2011. As a voluntary survey, the NHS has more non-response bias than a census so there is a risk that the results are not representative of the actual population, especially in smaller areas or population groups.
- Statistics Canada uses the global non-response rate (GNR) to assess the quality of the NHS estimates for various geographies. NHS estimates for any area with a GNR greater than or equal to 50% have a high level of error and should not be released.
- The GNR ranges by Health Neighbourhood from 19.3% to 46.9%. In general, rural areas tend to have a higher GNR.
- Neighbourhoods were sorted into five groupings (quintiles) based on the low income rate. Approximately 10 Neighbourhoods are in each quintile.
- Lower refers to at least 20% lower than Durham Region. Higher refers to at least 20% higher.
- For more information on this indicator see, [National Household Survey Dictionary, 2011](#) .

Release Date: January 2015.
