50	Ajax Northeast (A9)	71.7%	HIGHER	5

Visible Minorities (2011)

Table 3: Percentage of visible minorities by Durham Region Municipality

Municipality	Percentage	Compared to Durham Region
Pickering	35.4%	HIGHER
Ajax	45.8%	HIGHER
Whitby	19.2%	similar
Oshawa	9.3%	LOWER
Clarington	5.6%	LOWER
Scugog	2.4%	LOWER
Uxbridge	3.9%	LOWER
Brock	1.9%	LOWER
Durham Region	20.7%	Lower than Ontario
Ontario	25.9%	

What You Need to Know

- This indicator is classified as neutral in terms of direction with better health.
- The percentage of visible minorities ranges by Health Neighbourhood from 1.8% to 71.7%.
- Neighbourhoods with high percentages of visible minorities are concentrated in south west Durham Region in Ajax, Pickering, and Whitby. Rural areas in the north and in Clarington have small populations of visible minorities. The impact that belonging to a visible minority group can have on health is complex. Racism and racist experiences have been linked to social exclusion which can lead to poor health outcomes.

Indicator Notes

- This indicator measures the percentage of the population that indicated in the Census they were non-Caucasian in race or non-white in colour.
- Source: National Household Survey (NHS) 2011, Statistics Canada.
- The NHS replaced the long-form Census in 2011. As a voluntary survey, the NHS has more non-response bias than a census so there is a risk that the results are not representative of the actual population, especially in smaller areas or population groups.
- Statistics Canada uses the global non-response rate (GNR) to assess the quality of the NHS estimates for various geographies. NHS estimates for any area with a GNR greater than or equal to 50% have a high level of error and should not be released.
- The GNR ranges by Health Neighbourhood from 19.3% to 46.9%. In general, rural areas tend to have a higher GNR.
- Neighbourhoods were sorted into five groupings (quintiles) based on the percentage of visible minorities. Approximately 10 Neighbourhoods are in each quintile.
- Lower refers to at least 20% lower than Durham Region. Higher refers to at least 20% higher.
- For more information on this indicator see, [National Household Survey Dictionary, 2011](#). For information about visible minorities and health see, [Colour Coded Health Care](#), and about social exclusion and health see, [The Canadian Facts](#).

Release Date: January 2015.
