What you need to know

- This indicator is classified as neutral in terms of the direction related to health. Lower migration is better for health if it reflects greater stability. However, higher migration could be positive if it is for better housing and opportunity, and negative for health if people cannot find adequate housing.
- The percentage of movers ranges by Health Neighbourhood from 4.8% to 19.4%.
- Neighbourhoods with high mobility include the seven Priority Neighbourhoods and those that have high population growth such as Ajax Northeast and Oshawa Northeast.

Indicator Notes

- This indicator measures the percentage of the population aged one year or older that moved their place of residence in the past year.
- Source: National Household Survey (NHS) 2011, Statistics Canada.
- Mobility refers to the status of a person with regard to the place of residence on the reference day, May 10, 2011, in relation to the place of residence on the same date one year earlier. Persons who moved residence are referred to as movers. See: [National Household Survey Dictionary, 2011](#).
- The NHS replaced the long-form Census in 2011. As a voluntary survey, the NHS has more non-response bias than a census so there is a risk that the results are not representative of the actual population, especially in smaller areas or population groups.
- Statistics Canada uses the global non-response rate (GNR) to assess the quality of the NHS estimates for various geographies. NHS estimates for any area with a GNR greater than or equal to 50% have a high level of error and should not be released.
- The GNR ranges by Health Neighbourhood from 19.3% to 46.9%. In general, rural areas tend to have a higher GNR.
- Neighbourhoods were sorted into five groupings (quintiles) based on the mobility rate. Approximately 10 Neighbourhoods are in each quintile.
- Lower refers to at least 20% lower than Durham Region. Higher refers to at least 20% higher.
- Priority Neighbourhoods were identified in December 2015 as communities that require focus to build on health and well-being. The Priority Neighbourhoods are: 1) Downtown Ajax – Ajax, 2) Downtown Whitby – Whitby, 3) Lakeview – Oshawa, 4) Gibb West – Oshawa, 5) Downtown Oshawa – Oshawa, 6) Central Park – Oshawa, 7) Beatrice North – Oshawa.
