

Agri-Business Sector

- ✓ Be aware of the most current, credible public health information/recommendations, and communicate these to your staff and the public. For further details refer to [Ontario's COVID-19 public health measures and advice](#).
- ✓ Consider establishing and maintaining a COVID-19 safety plan for businesses/organizations which outline the steps taken to protect staff and the public against COVID-19 within the facility. For more details visit the Durham Region Health Department's [Safety Plan Template](#), [COVID-19 Workplace Safety Plan Checklist](#) and the Province's [Develop Your COVID-19 Workplace Safety Plan](#).

Consider posting signs at all entrances directing those who are ill not to enter. Advise staff and patrons to stay home if they are experiencing symptoms of COVID-19 or have been in **close contact** with anyone who has been sick with the virus.

Encourage mask use for indoor public spaces. Masks are still required for select indoor settings including long-term care homes and retirement homes, subject to limited exemptions.

Encourage all businesses and organizations to establish and implement their own COVID-19 vaccination policy.

Remind staff to wash their hands before and after eating, using the washroom or changing gloves. Post handwashing posters at the stations. Wash hands often for at least 20 seconds where possible or use hand sanitizer when hands are not visibly soiled.

Consider having properly stocked hand sanitizer stations at the entrance and throughout the premises for everyone to sanitize their hands.

If activities are provided (e.g. mazes, interactive displays, etc.), consider having timed entries, ticket systems or schedules to promote physical distancing.

Consider physical distancing whenever possible. For example, adding floor markers and signage to promote physical distancing, etc.

Consider implementing passive screening for all individuals entering the premises. For detailed guidance on screening, visit the Ministry of Health's [Ontario COVID-19 Screenings](#).

Cleaning and Disinfecting:

Items/equipment used during interactive activities should be cleaned and disinfected frequently.

- Clean and disinfect high touch surfaces/equipment frequently. Encourage cleaning and disinfecting high touch surfaces at least once a day and when visibly dirty. Use only disinfectants that have a Drug Identification Number (DIN) approved by [Health Canada](#).
- Ensure all tools and bins/buckets used by staff and patrons are cleaned and disinfected after each use.
- Washrooms provided for the public and staff should be cleaned and disinfected frequently. Washrooms must be properly maintained and equipped with adequate supplies at all times.
