For Health Care Professionals

Influenza Vaccine: Ordering Process Update

The demand for influenza vaccine continues to be very high this year.

Orders from health care providers to Durham Region are reviewed weekly and are filled based on vaccine availability. Please use the **revised [Influenza Vaccine Order Form](#)** available on www.durham.ca/hcp.

Effective October 30, 2020, all health care providers **will be contacted** directly by Durham Region Health Department and notified when their influenza vaccine order is available to be picked up.

For physicians who have submitted orders for HD-TIV, the orders will not be filled at this time.

For all questions and/or concerns regarding provincial influenza vaccine supply for the 2020-2021 influenza season, please contact the Ministry of Health directly at uiip.moh@ontario.ca.

October 30, 2020
