## **Influenza Vaccine: Influsplit**

Due to ongoing demand for influenza vaccine, the Ministry of Health has announced that **Influsplit Tetra Quadrivalent Vaccine is now available** and will be among the product mix when ordering quadrivalent influenza vaccine (QIV) from the Durham Region Health Department (DRHD).

Influsplit Tetra is currently identified on Health Canada's List of Drugs for an Urgent Public Health Need. Influsplit Tetra is currently authorized for use in Germany. As the vaccine is being imported internationally, the product provided has foreign labelling. Please refer to the manufacturer's letter and the translated product monograph that is attached to each order. Influsplit Tetra is an inactivated quadrivalent vaccine publicly funded and indicated for individuals 6 months of age and older.

Influsplit Tetra is packaged in pre-filled syringes. **Please ensure your designated vaccine fridge has sufficient storage space when ordering.**

Influenza order forms are available at [www.durham.ca/hcp](http://www.durham.ca/hcp). Health care providers will be notified by DRHD when influenza vaccine orders are ready for pick-up.
