

# CHILDREN/STAFF WHO BECOME ILL DURING CARE EXCLUSION COVID-19

SUBJECT	COVID-19
DATE	October 2021
PAGE	1 of 4

### **POLICY**

To ensure the health and well-being of children and staff within the Early Learning and Child Care Centre, children and staff who become ill while attending the program will be immediately isolated and required to leave the program. Staff must consistently assess their health and the health of children in care.

### **PROCEDURES**

#### When to exclude

If COVID-19 or any other infectious disease is suspected, the parent should be contacted immediately, and the child must be isolated from the other children and supervised until the parent arrives. Staff should ensure that the child is as comfortable as possible. Health department contact information related to inquiries about sick children or staff should be sent to <a href="EHL@durham.ca">EHL@durham.ca</a> or call the Helpline at 905-668-2020.

Parents should be advised to use the Provincial online <u>self-assessment tool</u> and follow instructions which may include seeking medical advice or getting a lab-based PCR COVID-19 test. Parents should also be provided with guidance as to when their child may return to care as per the guidance in COVID-19 Screening Tool for Children, Staff and Visitors in Durham Region Licensed Child Care. Suspected cases of COVID-19 do not require Serious Occurrence reporting.

### **Cross Reference Policy and Procedures Manual Section 3-200-205 -Outbreaks**

Any child who develops symptoms of ill health including one or more symptoms of ill health related to COVID-19 must leave the child care program. Symptoms should not be chronic or related to other known causes or conditions.

The symptoms most commonly associated with COVID-19 in children include:

- Fever and/or chills (temperature of 37.8°C/100°F or greater)
- Cough or barking cough (continuous, more than usual, making a whistling nose when breathing, not related to asthma, post-infectious reactive airways, or other known causes or conditions the child already has).
- Shortness of breath (out of breath, unable to breathe deeply, not related to other known causes or conditions the child already has).
- Decrease or loss of smell or taste (not related to seasonal allergies, neurological disorder, or other known causes or conditions the child already has).

#### PROGRAM POLICIES

# MEDICAL AND HEALTH REQUIREMENTS

SUBJECT	COVID-19
DATE	October 2021
PAGE	2 of 4

 Nausea, vomiting and/or diarrhea (Not related to irritable bowel syndrome, anxiety, menstrual cramps, or other known causes or conditions you already have).

Note: Nausea, vomiting and/or diarrhea is not included in the COVID-19 symptoms screening list for adults. Tiredness and muscle aches are included in the COVID-19 symptoms screening list for adults. Staff and visitors should be screened for these symptoms.

If the child has any symptoms (including fever, cough, difficulty breathing, vomiting, or diarrhea), the child must be isolated immediately from the other children in a separate room, if available, and supervised at all times.

The parent must be notified to arrange for pick-up of the child. The parent should be asked to ensure that the child is picked up within one hour of the time of the call. If the parent is not reached, an emergency contact person will be contacted to pick up the child within the hour.

Every effort must be made to keep the child comfortable until someone arrives to take him or her home.

Staff must document the situation in the Daily Communication Log and notify the Supervisor or designate immediately to ensure that this information is managed and recorded in the child's file on the Symptoms of III Health.

#### How to exclude

- Supervise the child in a designated room with a hand washing sink or hand sanitizer available. If a separate room is not available, the ill person should be kept at a minimum 2 metres distance from others.
- Notify parents/caregivers of the sick child for pick up.
- Children over 2 years of age should wear a surgical mask if tolerated and be provided with tissues and reminded of hand hygiene, respiratory etiquette (e.g., sneezing in sleeve) and proper disposal of tissues.
- Only one staff should be in the designated room and attempt physical distancing of 2 metres. Staff should wear a medical mask, goggles/face shield, gown, and gloves. In addition, staff should perform hand hygiene, avoid contact with child's respiratory secretions and attempt to not touch their face with unwashed hands.
- Increase ventilation in the designated exclusion room, if possible (e.g., open windows).
- All items used by the ill child should be cleaned and disinfected as soon as
  possible. Any items that cannot be cleaned (e.g. books, cardboard puzzles)
  should be removed and stored in a sealed container for seven days.

- The isolation room or area is to be cleaned and disinfected immediately after the child has been sent home.
- If the child care program is in a shared setting (e.g., school) follow Public Health direction for notification of others using the space.
- Children or staff who have been exposed to a confirmed case of COVID-19 should be excluded from the child care setting and follow Health Department recommendations.

### Returning from exclusion due to illness

- Staff/children who are being managed by Durham Public Health (e.g., confirmed cases of COVID-19, close contact of a confirmed case) should follow instructions from Durham Health Department to determine when to return to the facility.
   Confirmation from Durham Health Department will be required.
- A child can return to program based on the guidance provided by Public Health in the COVID-19 Screening Tool for Children, Staff, and Visitors in Durham Region Licensed Child Care. This may include receiving a negative lab-based PCR COVID-19 test result and being symptom-free for 24 or 48 hours, receiving an alternate diagnosis by a healthcare professional or waiting 10 days from the symptom onset and feeling better.

#### Staff Illness

Any staff person who suspects that they have an infectious disease should follow common sense precautions and should not attend the child care program if they are not well, particularly if their symptoms include any outlined in the COVID-19 screening. Staff must pass the daily screen to work at the Centre.

If a staff member becomes ill while at the Centre, they should, if possible, isolate themselves immediately until they are able to leave.

Staff members who begin to experience mild headache, fatigue, muscle aches and/or joint pain (with no other COVID-19 symptoms) and have received their COVID-19 vaccination within the past 48 hours may be experiencing post-vaccine symptoms and would not be required to leave the centre. If a staff member is still experiencing fatigue, or muscle aches after the 48-hour timeframe, they would be required to isolate themselves immediately until they are able to leave.

A staff person who presents with symptoms of ill health must notify their supervisor and complete the Provincial online <u>self-assessment tool</u> and follow instructions which may include seeking medical advice or completing a lab-based PCR test for COVID-19. Staff will follow the direction of Public Health if necessary.
