

BE PREPARED FOR SEVERE STORMS

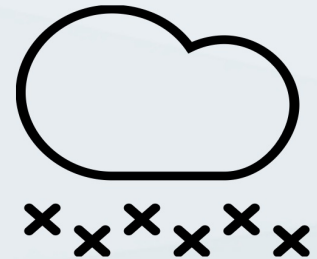

Thunderstorms & Lightning

High winds & tornadoes

Hail & snow storms

30/30 Lightening safety rule:

Take shelter when you can count 30 seconds or less between lightning and thunder. Stay indoors for 30 minutes after the last thunder.

Severe weather can happen at any time. It is important that you and your family are always ready.

An emergency kit should have enough food, water and medicine to last you and your family for at least three days.

Postpone outdoor activities when severe weather is forecast and remain indoors, if possible.

Monitor your local TV and radio stations, as well as Regional and municipal websites and social media channels for emergency information.
