

What privacy pros want YOU to know

Protect your devices

Install updates as soon as possible to give your devices the latest security upgrades and fixes.

Delete old apps

Delete applications you no longer use as it may be collecting your personal information.

Don't be tracked

Turn off location tracking so your past and present locations remain private.

Turn off Bluetooth

Turn off your Bluetooth when it's not in use. Don't make it easy for someone to connect to your device without your knowledge.

Log out

Remember to always fully log out of your accounts on shared or public devices; otherwise, someone can easily access your information.

Strengthen your password

Choose a random phrase or a memorable song lyric. Get creative and convert it using a combination of upper and lowercase letters, symbols, and numbers at least 15 characters long.

The sky is clear today = tH3sky1sc!e@rT0day
