CSWB Plan Land Acknowledgment

The Region of Durham is located on land which has long served as a site of meeting and exchange among the Mississauga Peoples and is the traditional and treaty territory of the Mississaugas of Scugog Island First Nation. We honour, recognize, and respect this nation and all Indigenous Peoples as the traditional stewards of the lands and waters on which we have the privilege to live.

We must acknowledge the perpetuated discrimination, numerous health crises, and the uncovering of the remains of Indigenous children and unmarked graves at Residential schools across our country, that were highlighted during the development of Durham's Community Safety and Well-Being Plan. Indigenous worldviews demonstrate the importance of community members taking care of one another and building community through shared environment, tradition, and knowledge. We understand that Western colonization, including policies, practices, and discriminatory laws, has devalued traditional Indigenous communities and we recognize the long-standing impacts this has had on Indigenous peoples.

Locally, we are committed to engaging and nurturing the relationship with Indigenous community members through building trust, reciprocity, and respect. We are committed to joining in the healing by connecting the past to the present and the future.

Miigwech/ Nia:wen/ Marsi/ Thank you/Merci

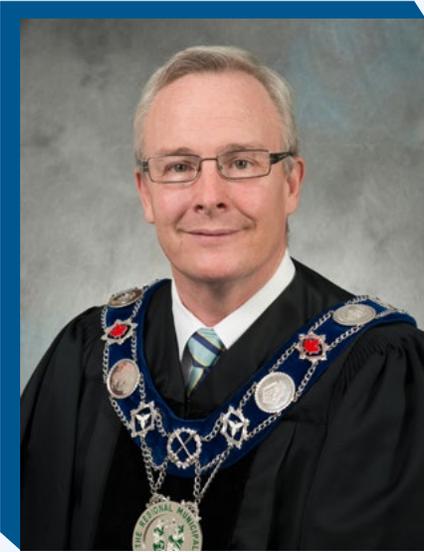

Message from Regional Municipality of Durham CAO and CSWB Plan Steering Committee Chair, Elaine Baxter-Trahair

As the CAO of the Regional Municipality of Durham, it is my pleasure to introduce the Region's first Community Safety and Well-Being Plan.

Durham is one of the fastest growing communities in Ontario. This Plan will serve to connect local plans and strategies, communities, people, and efforts across jurisdictions and community partners. Safety and well-being are the cornerstones upon which healthy, vibrant, prosperous communities are built. The COVID-19 pandemic has taught us the critical importance of community health, the impacts of income disparity, and the importance of all sectors working together to achieve common goals.

Guided by the spirit of a traditional African proverb, "If you want to go fast, go alone. If you want to go far, go together", the strength of this plan rests with the depths of its partnerships, strong leaders, and vibrant communities.

Durham is served by resilient not-for-profits, service providers and businesses that have come together to look beyond the horizon and see the opportunities collaboration can bring to the people who call Durham home. I invite you to see yourself in this plan.

CSWB Plan Message from Regional Chair John Henry

On behalf of Durham Regional Council, I am proud to introduce our first Community Safety and Well-Being Plan.

This plan serves as a call to action for Durham Region—a call for our leaders to work together in harmony and to champion the initiatives that will drive true change in our communities.

We strive to be a caring place where every person can live a life of dignity, and every community reaches its potential.

We remain focused on improving the life of people and businesses in Durham through everyday services, supporting public health and a clean environment, and working in partnership with the Durham Regional Police Service to create even safer communities.

This plan aims to improve more than just safety. It envisions a Durham where everyone feels not only safe, but also has a sense of belonging. A Durham where individuals and families' needs are met for education, health care, food, housing, income, as well as social and cultural expression. This plan envisions a Durham that is the best place in Ontario to live, work and raise a family.

I look forward to the work ahead, laid out in this plan, that will steer us toward this vision of a better Durham for all.

Message from Durham Regional Chief of Police, Todd Rollauer

On behalf of the dedicated members of the Durham Regional Police Service (DRPS), we commend Durham Regional Council for adopting the Community Safety and Well-Being (CSWB) Plan. Every day, our officers put their own safety at risk to make our community a safe place to live, work and play. And every day, they appreciate that they are not alone in their mission. Durham is richly endowed with many other highly capable partner agencies and organizations dedicated to addressing the underlying social challenges which all too often manifest in crime statistics; organizations with expertise in the priority risk factors identified in this plan.

As critical as law enforcement is to the welfare of our citizens, we have long realized that community safety requires a coordinated and sustained effort involving police and other first responders, social service agencies, healthcare professionals, educators and the many other community resources dedicated to keeping Durham residents healthy and safe. Our police service currently partners with many of these community organizations on projects and initiatives, including Durham Connect, DRPS Mental Health Response Unit, and De-Escalation Training.

We are constantly looking for ways to improve our community police services and the outcomes for all residents. We believe the CSWB Plan is an opportunity to create even better coordination, communication and collaboration among the police and all of our partner agencies. Only by working together will we succeed in our common mission to ensure Durham remains a safe, healthy and welcoming community for all residents.

Testimonials

Testimonial from Stakeholder

The Durham Community Safety and Well-Being Plan is a great opportunity to align service systems toward common priorities which will serve residents in more intentional and effective ways. Collaborations are key to successful communities and critical to achieving the objectives of the Community Safety and Well-Being Plan.

Paul McGary, MSW, RSW
Senior Director, Mental Health and Addictions - Pinewood Centre
Lakeridge Health

Testimonial from Community Leader

The non-profit and charitable sector contributes \$65 billion (B) to Ontario's GDP, more than the construction (\$50B), energy (\$15B) and agriculture (\$10B) sectors. We know our sector is critical to ensuring community health, prosperity, and vitality. Together, and in collaboration with our partners involved in the Durham Region Community Safety and Well-Being Plan, we can successfully achieve our common goals and values.

Vivian Curl
Executive Director, Durham Community Foundation

1. CSWB Plan Purpose

In January 2019, changes to the Police Services Act mandated communities across the province to develop Community Safety and Well-Being (CSWB) Plan. The province describes community safety and well-being as a place where everyone feels safe, has a sense of belonging, and where individuals and families can meet their needs for education, health care, food, housing, income, as well as social and cultural expression.

Following a thorough process of community engagement, the Region of Durham's CSWB Plan includes the following:

- Identification of priority risk factors¹
- Identification of programs, strategies, and bodies to address those priority risk factors
- Measurable outcomes to track the effectiveness of the CSWB Plan
- Presentation of action items and a short-term implementation plan

It should be noted at the outset that a Secretariat, to be created in 2022, will be established to guide the ongoing implementation of the CSWB Plan. Immediately following endorsement of this Plan by Regional Council, it will be forwarded to the Ministry of the Solicitor General.

2. Benefits of CSWB Plan

No one organization or sector can have total responsibility for community safety and well-being. Building robust community capacity to ensure residents have access to the right services at the right time is the responsibility of all sectors. The CSWB Plan provides an opportunity to intentionally align existing relationships, plans, and strategies at the regional, area municipal, and community level to make the best use of resources, avoid duplication, learn best practices, and facilitate effective cross-sectoral collaboration.

Residents, organizations, institutions, and municipal partners in the Region of Durham will benefit from the CSWB Plan. The CSWB Plan will serve as an umbrella document creating the opportunity for plans and strategies at the regional, municipal, and community levels to align. The CSWB Plan creates a formal framework to convene system and sector leaders to share, plan, and strategize together. This includes the involvement of persons with lived experience and the not-for-profit community, which is vital to community safety and well-being.

¹Risk factors: negative characteristics or conditions in individuals, families, communities or society that may increase social disorder, crime or fear of crime, or the likelihood of harms or victimization to persons or property.

3. CSWB Plan Framework

The CSWB Plan calls upon different sectors, institutions, and service delivery agents, to share in the collective responsibility of creating the type of community we want to live in.

The CSWB Plan acknowledges this work must extend beyond the system of policing to address complex social issues that often contribute to crime and poor health. Figure 1.1 demonstrates how the planning framework focuses on improving early interventions and upstream services, as the key to shifting away from acute care and punitive action. The intention is to offer residents the right services at the right time.

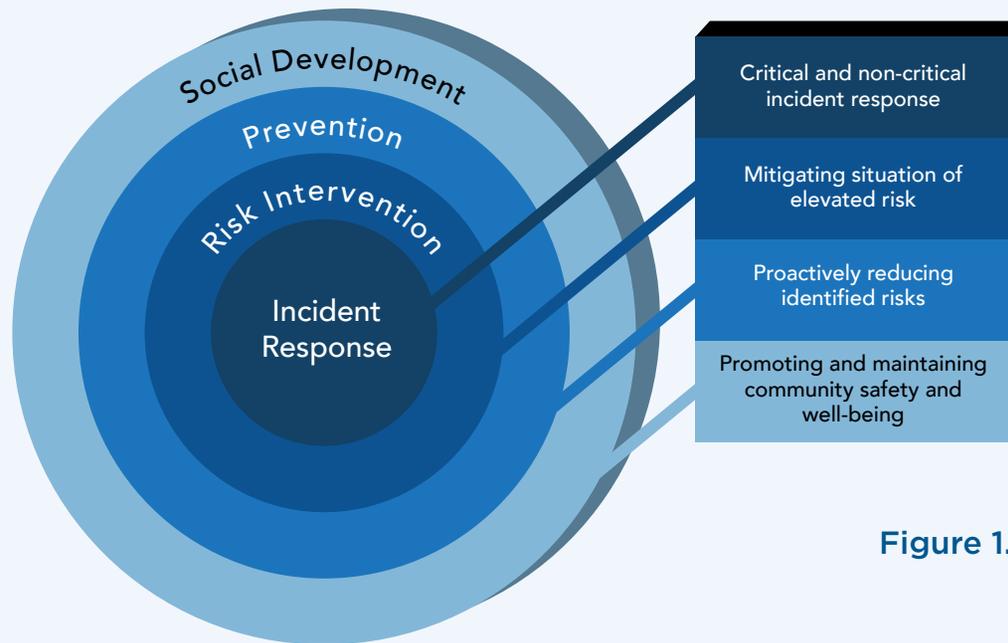

Figure 1.1

Figure 1.1 illustrates that by using community-based planning, such as a CSWB Plan, many of the crises and incidents that occur, could potentially be avoided or reduced, if collaborative social interventions addressed the originating issue. These rings show the interconnectedness of community challenges and the importance of addressing issues across all four levels in the service spectrum.

The focus and efforts of the CSWB Plan rest primarily in the social development and prevention rings, promoting alignment and integration of services. This approach utilizes critical community services, such as emergency responders, in a more effective and intentional manner. It also provides system users with more information about what is available and more control over their options.

4. Impact of COVID-19

A CSWB Plan provides the framework for communities to collectively respond to emerging issues, allocate resources, and leverage best practices. COVID-19 revealed new vulnerabilities in the community and as a result, new partnerships and bodies of work were developed to address community need. Intelligence gathered from the pandemic helped inform the CSWB Plan, demonstrating the advantages of being able to swiftly pivot to react to an ever-evolving reality. The impacts of the pandemic are still being understood and will continue to be considered throughout the implementation of this Plan.

5. Durham Region: Community Overview

Durham Region is a great place to live, work, and build a life. As the eastern anchor to the Greater Toronto Area, Durham offers prime access to a consumer market of more than five million people. The broader region provides a wide range of programs and services to a growing, and increasingly diverse community of residents, businesses, and visitors.

Today, the region is home to over 700,000 people. As shown in Figure 1.2, Durham is comprised of eight area municipalities and by the year 2051, the population is forecast to increase to 1.3 million people, with over 460,000 jobs. As Durham continues to grow, the importance of maintaining high levels of safety and well-being is a top priority.

Durham Region is performing well against many indicators of safety and well-being. However, we know there are areas for improvement, requiring targeted, collaborative, and intentional solutions.

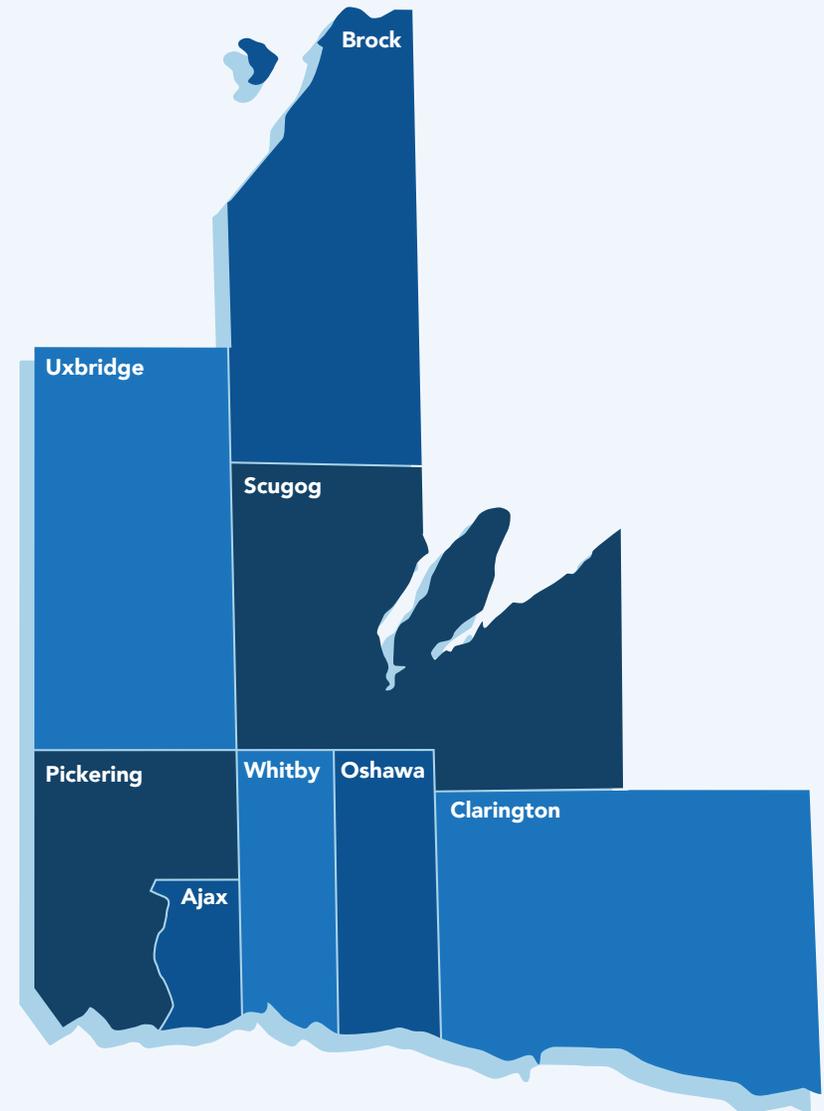

Figure 1.2

To fully understand the main issues facing the region, several key indicators and data sets were assessed to identify priority risk factors. Figure 1.3 displays some of these data points.

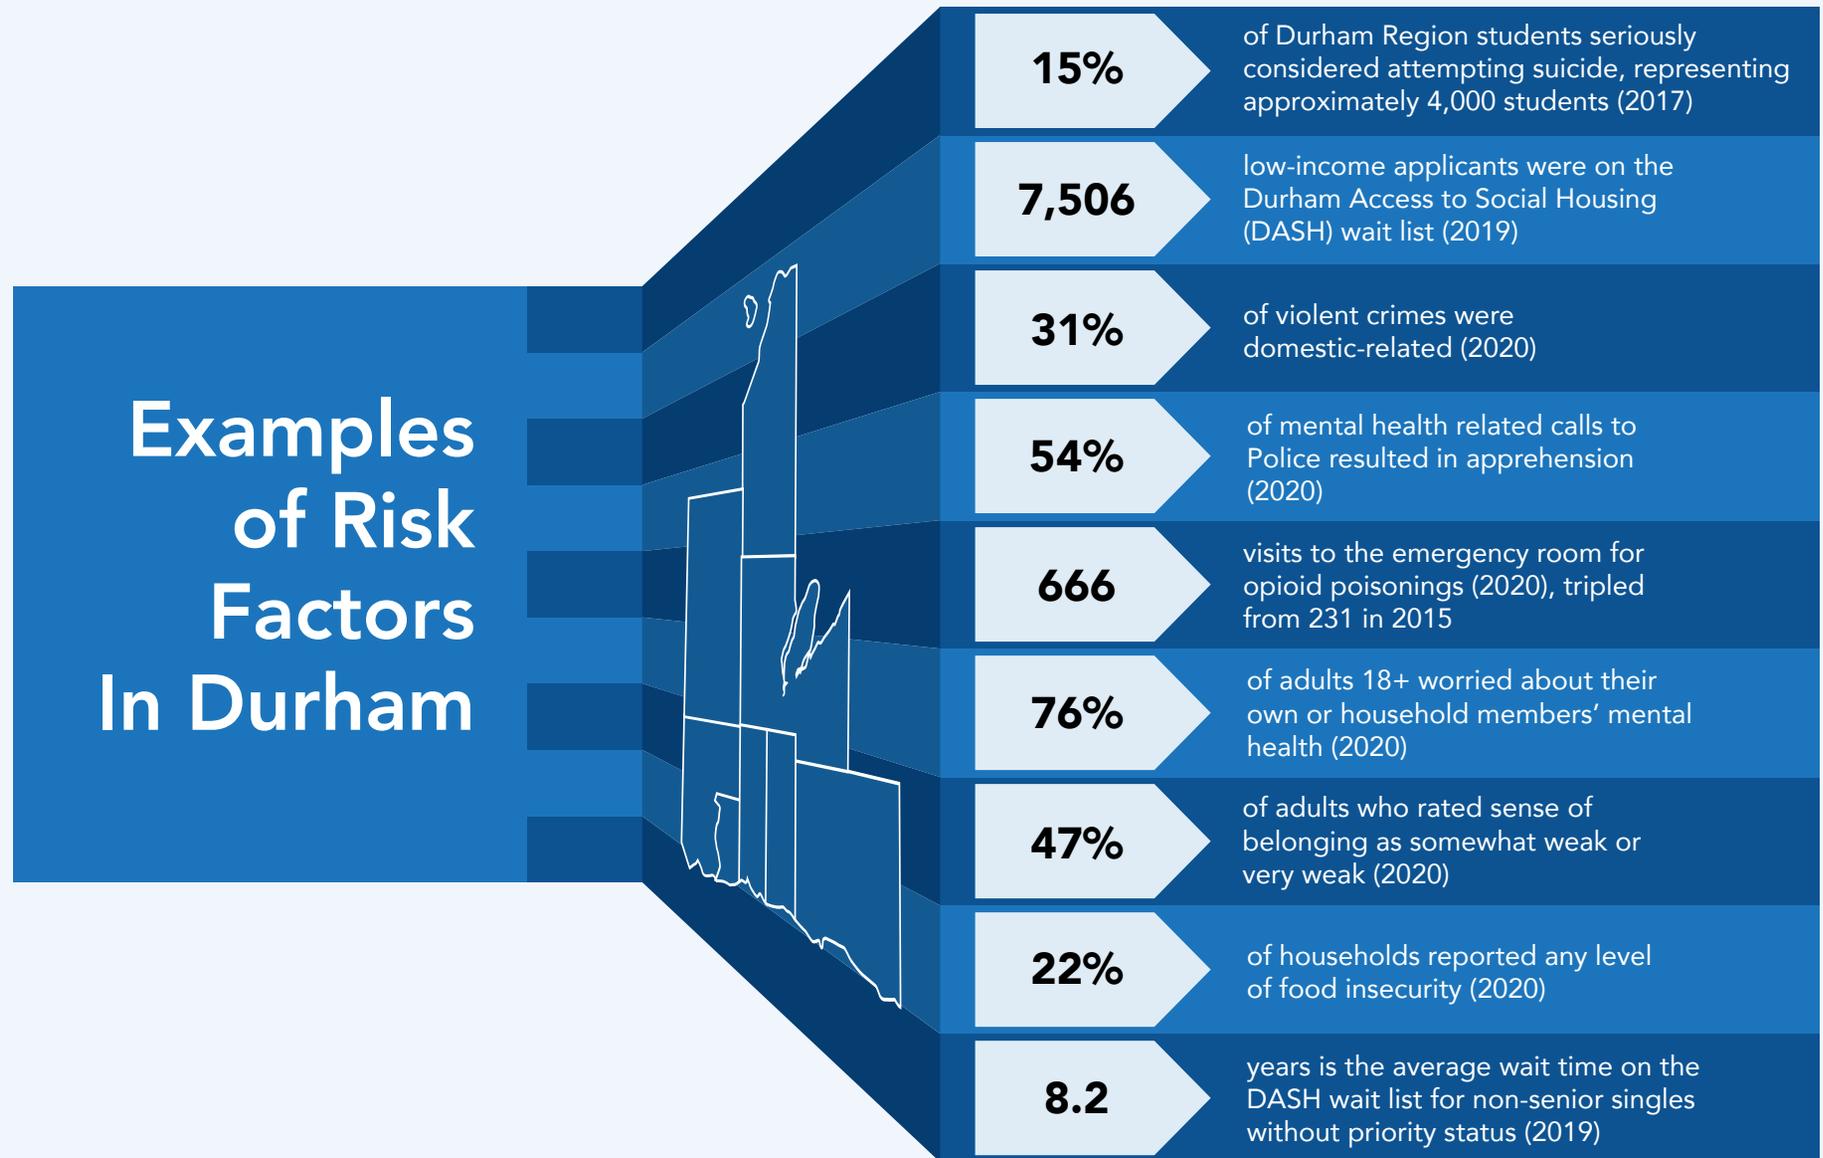

Figure 1.3

6. Priority Risk Factors

Based on the analysis of data, feedback from stakeholders, and community engagement outlined in Section 8 of the Plan, Figure 1.4 outlines the identified priority risk factors:

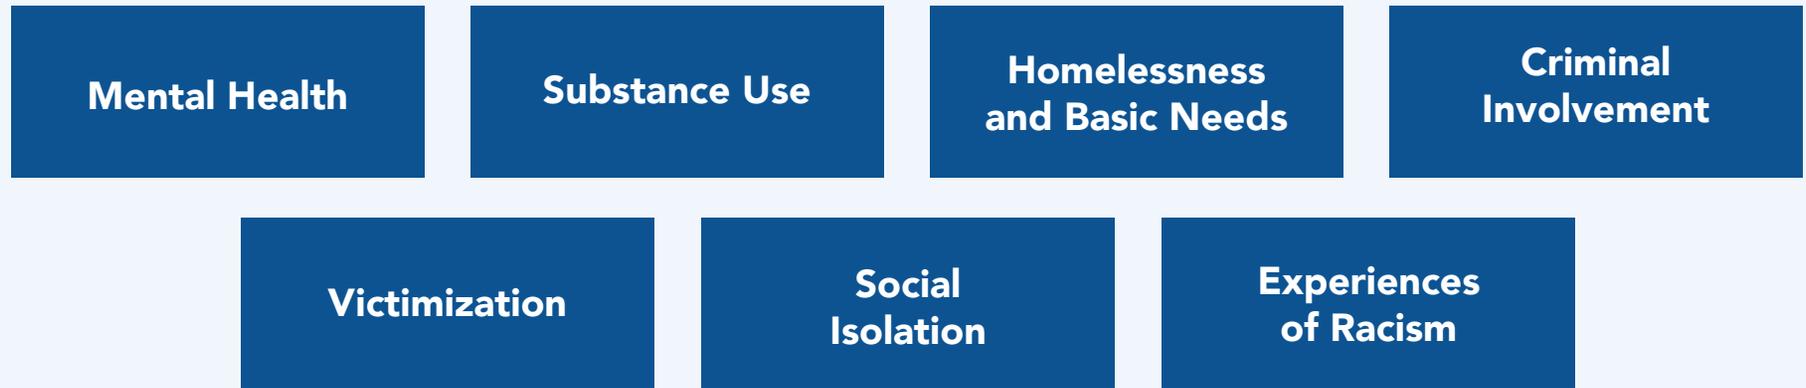

Figure 1.4

The following provides more information about each priority risk factor:

Mental Health

Mental health was immediately identified as a priority through the community engagement process and supported by Regional data. Three-quarters of Durham Region adults are worried about their own or a household members' mental health and the percentage of people who rate their mental health as fair or poor has been increasing. The percentage of adults 18+ in Durham Region who reported their mental health as excellent or very good decreased from 71% in 2013 to 62% in 2019.

Aside from a temporary decrease in 2017, the proportion of mental health-related calls that resulted in a mental health apprehension has been on the rise since 2016. Recently, 2019 and 2020 saw the highest proportion of mental health-related calls that resulted in a mental health apprehension.

Themes emerged around lengthy waitlist times, barriers to service and complicated referral processes. The negative impact of the pandemic on mental health was reflected through feedback from the community during open house sessions and the public survey.

Substance Use (e.g., cannabis, opioids, alcohol)

Substance use data highlighted how demands for support services are on the rise. Local data showed emergency department visits for opioid poisonings tripled from 2015 to 2020 and opioid deaths more than tripled in the same time period.

Geography plays a key role in access to services for substance use specific programs and access to rehabilitation programs is not meeting the current demands of the community. It was also noted that people can struggle with concurrent disorders, both substance use and mental health concerns occurring at the same time, and therefore, the importance of understanding the interrelatedness of these priorities was identified. For these reasons, it is important for services to be geographically distributed based on population and community needs.

Homelessness & Basic Needs (e.g., no stable housing, inability to meet basic needs, food insecurity)

The demand for housing is exceeding local supply, which is having an impact on the demands for homelessness services in the community. In 2019, the data showed that of the 7,506 low-income applicants on the Durham Access to Social Housing (DASH) wait list; 44.8% were families, the average wait time was 8.2 years for a single non-senior person without priority status, and despite being the largest cohort on the DASH wait list, only 10 non-senior applicants were housed without priority status in 2019 (six singles and four families). All of these applicants were housed through programs not tied to legislated wait list rules or with alternative housing providers that have a mandate to house people who are homeless or hard to house.

The data also shows that just over half of the individuals experiencing homelessness have visited the emergency department an average of three times, 17% had, on average, four interactions with police, and 16% reported periods of incarceration.

Themes regarding the demand for housing outweighing the local supply, how lack of housing impacts service delivery for individuals requiring multiple services, and the interconnectedness of homelessness and other community resources were emphasised throughout engagement sessions. Participants also shared valuable insights on the effects of the pandemic on homelessness and poverty, specifically food insecurity and the impact on mental health.

Criminal Involvement (e.g., gangs, use of guns, other illegal activities)

Criminal involvement as a priority risk factor includes, gangs, use of guns and other illegal activities. Durham Regional Police took a record 114 illegal guns off the streets in 2020, a 50 per cent increase in three years. Sixteen of those “crime guns ²” were discovered and seized during routine traffic stops.

Engagement participants shared observations of an increase in incidents involving tagging, vandalism, graffiti, and exploitation throughout the pandemic.

Victimization (e.g., control and use of threats or violence to exploit another for financial gain, abuse or neglect from a family member or intimate partner)

Victimization as a priority risk factor includes, sexual and/or physical assault, domestic violence, human trafficking, and robbery. In 2020, the percentage of violent crime that was domestic-related was at its highest since 2016, at 31%. The proportion of repeat victims of all violent incidents has been on the increase since 2017, and 2020 represented the highest year.

Human Trafficking (HT) is the fastest growing crime in Canada. Of all human trafficking in Canada, 66% occurs in Ontario and it is a growing problem in Durham Region. DRPS’ human trafficking unit has reported a year-over-year increase in human trafficking investigations since 2018. In 2020, the HT unit conducted 137 investigations.

Participants in the engagement sessions pointed out new forms of harassment are happening online and there is an increase in human trafficking. Participants also highlighted the increasing mental health and social isolation experienced by domestic violence survivors as they are restricted to spending more time at home as a result of lockdown measures. This has also been referred to as the “Shadow Pandemic ³”.

² A “crime gun” is any firearm that is unlawfully obtained, possessed or used in a crime, has an obliterated serial number, or has been otherwise modified to be a firearm.

³ Increase in violence toward women and girls during the COVID-19 pandemic.

Social Isolation (e.g., living alone without support or too far away from services)

Social isolation as a priority risk factor includes, hoarding, loneliness, elder abuse, sense of belonging, and live-in support gaps. In late 2020, only 53% of adults 18+ rated their sense of belonging to the local community as strong or very strong in an online survey compared with over 80% in 2018 and 2019 in telephone surveys.

Throughout the engagement sessions outlined in Section 8, there was consensus that rates of social isolation have increased since the pandemic across all demographics and age groups. Participants also emphasized that the pandemic has elevated the collective understanding of social isolation and how it relates to the other areas of priority. It was further stated that social isolation is about people who are disconnected from their support network, which impacts their sense of well-being.

Experiences of Racism (e.g., identify barriers of anti-racist practice)

The CSWB Plan consultation process amplified the community's commitment to deliberate and intentional work designed to address racism, specifically anti-Black and anti-Indigenous racism. This work will focus on identifying barriers and other anti-racist practices. This work will be linked with the efforts already underway at the Region of Durham and will be a priority of the CSWB Plan Implementation Plan. This will ensure the most effective use of resources, providing consistent messaging and leveraging best practices across the province.

7. Durham's Approach to Plan Development

The CSWB Plan follows a data driven model, built on community engagement. This Plan required a unique level of inclusiveness, to bring together a broad range of intelligence, skills, expertise, experiences, and institutional knowledge from all sectors. Figure 1.5 was developed to illustrate the approach to developing the CSWB Plan. The process began by analyzing Regional and DRPS data and followed an extensive engagement process, including oversight from the Steering Committee, to develop a Durham specific plan.

To assist in the identification of local priority risk factors, a comprehensive data review was undertaken using several data sources which included:

- Provincial Risk-Driven Tracking Database
- Statistics Canada
- Health Department data including Durham Region Health Neighborhoods
- Durham Regional Police Services data
- Paramedic Services data
- Social Services and Housing data
- Feedback through two public surveys and three open houses
- Service provider/stakeholder roundtable
- Guidance and feedback from the Steering Committee, area municipal working group and internal working groups

An Illustration of Durham's Approach to Plan Development

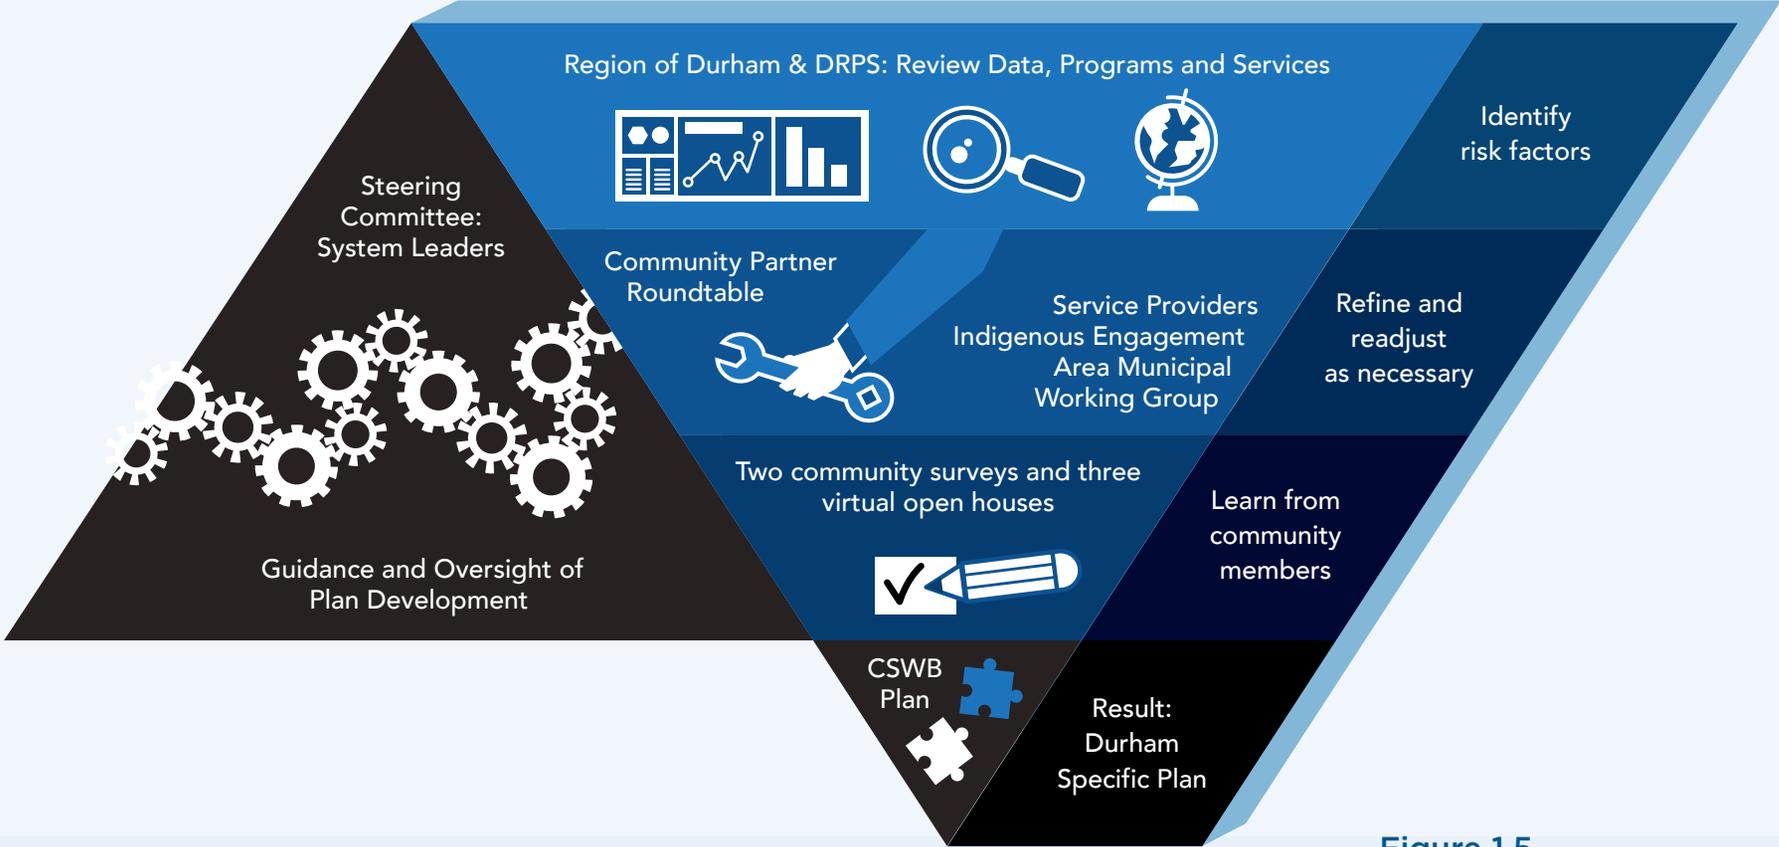

Figure 1.5

The following teams worked collectively to ensure the data findings aligned with the professional judgement and experience of senior level staff and system leaders. The following outlines the responsibilities of these groups:

- **Internal Working Group and Data Sub-Committee:** An internal Regional working group and data sub-committee met regularly to analyze data, plan, coordinate, and develop public engagement activities. These groups had senior Regional staff representation from the CAO's Office, DRPS, Planning and Economic Development, Social Services, Health, Paramedic Services and Corporate Communications. This group acted as a conduit for the transfer of information from the Working Groups to the Steering Committee. Please see Appendix B for a detailed list of working group and data sub-committee members.
- **Steering Committee:** The Steering Committee, chaired by Elaine Baxter-Trahair, Regional CAO, is comprised of system leaders who manage diverse systems across the Region including health, mental health and addictions systems, justice, education, child protection and more. Please see Appendix B for a detailed list of Steering Committee members. During implementation, the Steering Committee will evolve to reflect the priorities identified in this Plan.
- **Area Municipal Working Group:** An area municipal working group was established to ensure an integrated approach to identifying and addressing local priorities. This group is comprised of area municipal CAOs or delegates. Please see Appendix B for a detailed list of area municipal working group members.

8. Community Engagement

Leadership has remained committed to developing a stakeholder-driven CSWB Plan to serve as a foundational human services planning document integrating and aligning the work of Durham's stakeholders. It is imperative for service providers, stakeholders and residents to see themselves in this Plan.

Different methods were used to raise awareness of the Plan, to ensure the greatest number of stakeholders understood its importance and were invited to participate in its development. These methods included:

- Regular reporting to Regional Council
(Reports: [2019-COW-15](#); [2019-SS-17](#); [2021-INFO-16](#); [2021-COW-11](#); [2021-INFO-79](#))
- Project website (durham.ca/cswbplan)
- Social media campaign
- Print material distribution
- Leveraging existing events and partnerships
- Television interview - Seniors Talk with DRPS (Rogerstv)
- Newspaper interview – Uxbridge Times

In addition to this multi-media project promotion, many engagement formats were utilized. The following outlines the major engagement milestones throughout the development of the CSWB Plan.

Community Partner Roundtable (November 2019):

- Community partners, all dedicated to the delivery of programs and services that focus directly on community safety and well-being were convened. Almost 100 stakeholders contributed to this full day workshop.
- Staff from the Ministry of the Solicitor General provided a summary of the legislative context.
- Attendees had an opportunity to receive information and give feedback about the six areas of elevated risk and collectively develop action plans to address these areas.

First Public Survey (February - March 2020, Pre-pandemic):

- The purpose of the survey was to validate findings and learn from those who live and work in Durham Region about challenges and opportunities related to community safety and well-being.
- The survey received 403 responses and most participants agreed with the priority risk factors identified in the data.

Second Public Survey (May - June 2021):

- The second survey was an intentional opportunity to ensure the impacts of COVID-19 were reflected in the identification of priority risk factors. It also collected potential action items to inform the Implementation Plan.
- The survey received 379 responses and most participants agreed with the previously identified priority risk factors.

Community Virtual Open Houses (June 2021):

- The goals and objectives of the open houses mirrored those of the second public survey (above).
- Three virtual open house sessions were hosted, each targeting a different population group: equity groups, or those working on equity issues, the public, and service providers.
- The open houses had a total of 57 participants, representing over 35 organizations.

9. CSWB Plan - Foundational Action Items

The CSWB Plan is an important step toward the development of an integrated, multi-sectoral collaborative approach to community safety and well-being in Durham Region. This Plan will remain a living document, committed to evolving in response to the realities and challenges facing the community. Additionally, the CSWB Plan will be reviewed on a regular basis in alignment with the Region's Strategic Plan.

The following action items are the result of feedback collected through the numerous engagement sessions held throughout the development of the plan.

1. Create a CSWB Plan Secretariat

The CSWB Plan will require secretariat support to provide key functions to lead, sustain, grow, coordinate, and operationalize the work of the CSWB Plan. The key functions will include engaging stakeholders, identifying collaborative partnership opportunities within all sectors, building the Implementation Plan, and assisting in future plan development. This Secretariat, to be created in 2022, will be the key to the successful implementation of the Plan.

2. Establish a Citizen Advisory Table

Successful community plans rely on input from a variety of sources. The CSWB Plan will benefit from the voices of residents with lived experience through a Citizen Advisory Table. This diverse group of residents will ensure continuous improvement and create a mechanism to respond to emerging issues.

3. Launch the CSWB Plan Information Hub

The CSWB Plan is an opportunity to demonstrate and grow the type of institutional maturity that attracts investment, where businesses, residents, service providers and innovators can find local data, new partnerships and existing bodies of work that will help to inform their planning and service delivery. This tool will result in a level of community maturity that investors, talent, and funders require, and it will continue to strengthen relationships within the business community.

As shown in Figure 1.6, the first iteration of the Information Hub (Hub) will include the Community Safety and Well-Being Plan, a physical asset map (Health Neighbourhoods), a searchable program and strategy catalogue, a link to Durham 211 and a new data dashboard. The Hub will continue to grow with the support of the CSWB Plan Secretariat. Work is underway between the Region and local post-secondary institutions to map the networks of social organizations across the region. This work will build on existing databases of service providers to better understand how groups are working together, the respective partners and mandates of each organization.

The information on the Hub will serve as a resource to the broader community and result in the easy identification of work underway, creating opportunities for partnerships, opportunities for efficiencies and avoiding duplication in services and programs.

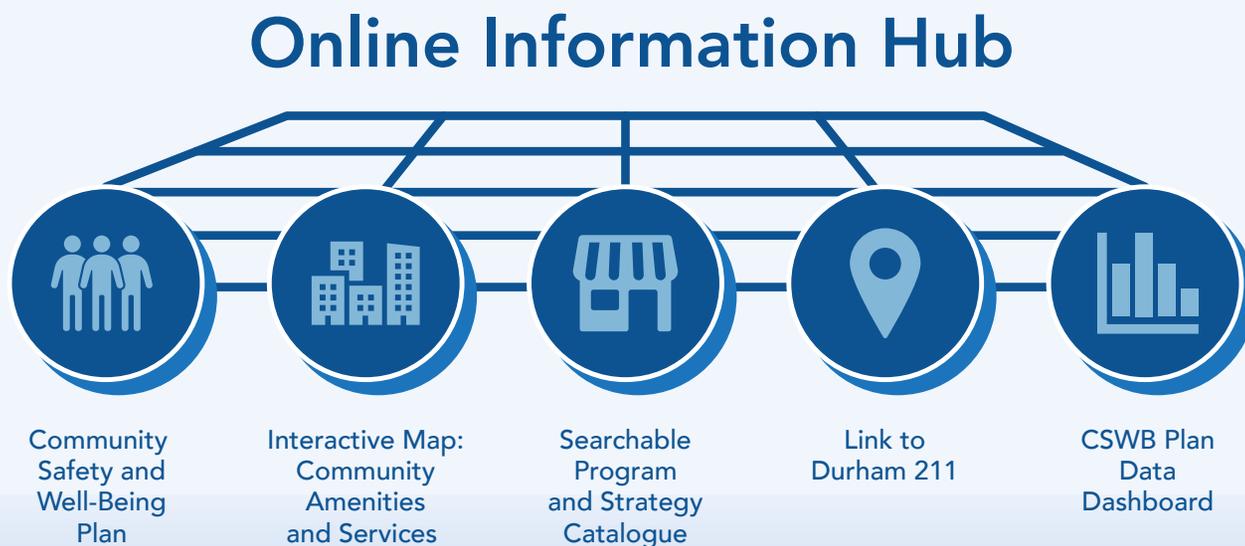

Figure 1.6

4. Advance Existing Programs, Strategies and Bodies

A list of regional programs and strategies has been identified that relate to the priority risk factors (Appendix C). A searchable catalogue will be available on the CSWB Plan Information Hub, to be used as a resource to the community and a driver of economic development by way of capacity building.

With the support of the Secretariat, this catalogue will continue to grow to include a wider, community-based, inventory of programs and strategies. This support will help inform future planning by the broader community, future funding opportunities and partnerships as they relate to the outcomes of the priority risk factors.

5. Establish Performance Indicators

Having accurate and timely data, widely available to our community members and service providers is critical to informed policy and planning development. These data points will comprise the data dashboard which will be housed on the CSWB Plan Information Hub. This data will be available to community partners looking to grow services and meet needs in Durham Region, demonstrating to funders, through data and partnerships, that Durham has the capacity to manage further investments.

Through the work of the CSWB Plan, the following data points have been identified to act as trackable performance indicators:

- Mental health-related calls to the police
- Police mental health calls resulting in apprehensions
- Self-rated mental health (excellent or very good)
- Self-harm emergency department visits in youth aged 10 to 24
- Paramedic calls related to suspected opioid overdoses
- Infants born with neonatal abstinence syndrome
- Emergency department visits for opioid poisoning
- Deaths due to opioid poisoning
- People actively experiencing homelessness
- People experiencing homelessness who moved into housing
- Total people housed
- Percent of households with food insecurity
- Sense of belonging (strong or very strong)
- Seniors living alone (65+)
- Youth diversion rate
- Crime severity index
- Property crime rate
- Violent crime rate
- Percent of violent crime that is domestic-related
- Percent of repeat victims of violent incidents

6. Actions Related to Individual Priority Risk Factors

The following outlines the top three recommended action items for each of the priority risk factors. These action items were informed by the second community survey in 2021 and provide a starting point for consideration by the Steering Committee and working groups during implementation. Future work will be approached with the recognition that historic and systemic disparities exist within our structures and systems. There are no timelines associated with these action items as it will be job of the Secretariat in collaboration with the working groups to establish a plan to address these issues.

Mental Health

1. Improve supports and services to foster positive mental health
2. Increase awareness about the programs and services available in Durham Region
3. Develop community hubs that deliver programs and services in one place

Substance Use

1. Streamline and improve programs and services to make them more accessible for people experiencing addiction
2. Increase awareness about the programs and services available in Durham Region
3. Involve people with lived experience in developing programs and services

Homelessness & Basic Needs

1. Provide supportive housing options for those who cannot live independently
2. Increase and improve coordinated, outcome-based supports and services to address homelessness

3. Create more affordable housing options

Criminal Involvement

1. Develop and improve preventive programs and services (e.g., hubs) to address the root causes of violence and crime
2. Develop programs for income support and skill development for young people
3. Develop holistic, systemic, and comprehensive approaches to address crime

Victimization

1. Develop and improve preventive programs and services to address the root causes of violence and crime
2. Develop holistic, systemic, and comprehensive approaches to address victimization
3. Increase awareness about the programs and services available in Durham Region

Social Isolation

1. Provide programs that connect people with the community
2. Increase awareness about the programs and services available in Durham Region
3. Increase awareness of volunteer opportunities

Experiences of Racism

1. Enhance representation of diverse population groups and their perspectives in developing policies and delivering programs and services
2. Apply an equity lens to the design and delivery of all programs and services
3. Involve people with lived experience in designing and improving programs, supports and services

10. Continuous Improvement and Reporting

Durham's Community Safety and Well-Being Plan establishes a collaborative framework for integrated service delivery, working with community partners to encourage an upstream approach. Starting in 2023, the CSWB Plan Secretariat and working groups will report to Council annually and post those reports on the CSWB Plan Information Hub.

This Plan will be tied to the Region of Durham Strategic Plan and reviewed in 2024, creating alignment and efficient use of resources.

11. Next Steps & Implementation

As the Region of Durham continues to grow and mature, the Community Safety and Well-Being Plan will do the same. The CSWB Plan is a living document, designed to be responsive and flexible to community needs. It will be reviewed and updated throughout implementation as the Steering Committee and working groups continue to receive feedback and recommendations from community partners and stakeholders.

The work of the CSWB Plan, specifically the action items, will be supported through an implementation plan which will guide the work of the Secretariat and act as a measurable, outcome-based reporting tool. All stakeholders, led by the Region and DRPS, will continue to work together. The Secretariat will receive data from a number of sources, including the Risk-Tracking Database, to ensure local data informs local planning.

Figure 1.7 illustrates the CSWB Plan implementation structure. Working Groups will drive implementation and will be organized by priority risk factor. Please see Appendix A for Durham's CSWB Plan Year One Implementation Plan. This Plan offers meaningful direction in getting the right services, to the right people, at the right time.

CSWB Plan Implementation Structure (2022 and beyond)

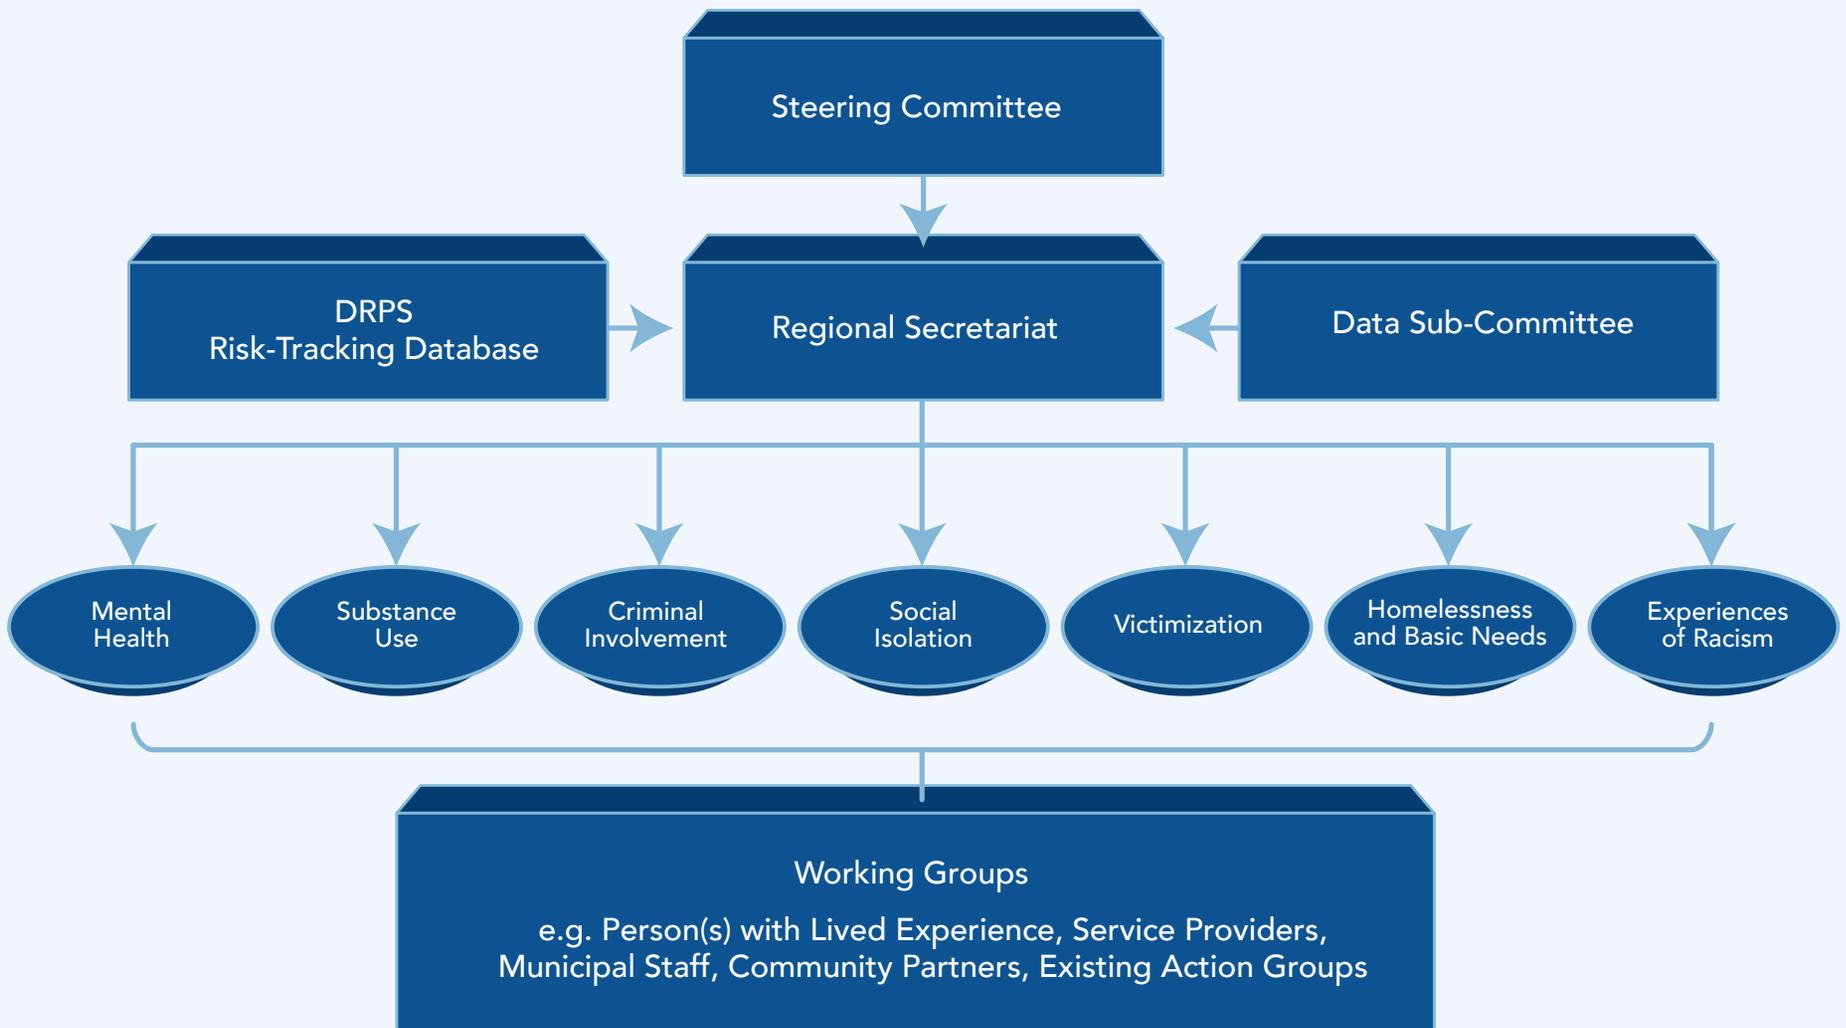

Figure 1.7

Appendix A: Durham Community Safety and Well-Being (CSWB) Plan Implementation Plan:

The Regional Municipality of Durham Community Safety and Well-Being Plan was adopted by Council on (hold for date). This document is a first step toward realizing the objectives laid out in the Plan as identified by the community. The Implementation Plan, like the CSWB Plan, is a living document and is designed to be flexible and respond to community needs as they arise.

The Implementation Plan is subject to review on a regular basis with the CSWB Plan. The CSWB Plan is set to be reviewed in tandem with the Corporate Strategic Plan for the Regional Municipality of Durham.

While the work of the CSWB Plan is the collective responsibility of the broader community, making sure it happens is the responsibility of the Secretariat. Working groups will be assembled by the Secretariat to create work plans, set objective and goals. This Implementation Plan sets the critical first steps toward shifting from planning to action.

Below are the identified action items for year one following the creation of the Secretariat, availability of resources, and public health and social service priorities.

Year One (2022): Activities

1. Establish the CSWB Plan Secretariat

Key partners:

- Human Resources, Region of Durham
- DRPS
- Regional Council

Description and Key Tasks

- Appoint a CSWB Plan interim lead
- Secure budget
- Work with HR to develop competition documents
- Develop Terms of Reference
- Hire and train

2. Host Greater Toronto and Hamilton Area (GTHA) Community Safety Symposium

Key partners:

- CAO's office
- DRPS
- GTHA Municipalities

Description and Key Tasks

- Liaise with GTHA partners
- Liaise with DRPS and CAO's office
- Liaise with community

3. Assemble Working Groups (7)

Key partners:

- Secretariat
- System Leaders
- Municipal partners
- Service Providers
- Diversity, Equity and Inclusion Office, Region of Durham
- Data sub-committee

Description and Key Tasks

Identify a lead agency for each area of priority

- Develop Terms of Reference (7)
- Develop Action Plans
- Work closely with area municipal staff to align similar goals and objectives such as supporting the City of Oshawa in implementing the Downtown Oshawa Action Plan

4. Transition from Planning to Implementation: Steering Committee and Working Groups

Key partners:

- System Leaders
- Municipal Partners
- Region of Durham staff

Description and Key Tasks

Develop Terms of Reference (TOR) for CSWB Plan Steering Committee, Working Group and Area Municipality Working Groups for implementation

- Administration: scheduling meetings, minutes

5. Establish a Citizen Advisory Table

Key partners:

- Secretariat
- Diversity, Equity and Inclusion Office, Region of Durham
- DRPS

Description and Key Tasks

Recruit for and develop a Citizen Advisory Table

- Develop process
- Actively recruit
- Develop Terms of Reference

6. Experiences of Racism

Key partners:

- Diversity, Equity and Inclusion Office, Region of Durham
- Indigenous leaders

Description and Key Tasks

Identify how CSWB Plan intersects with anti-Black and anti-Indigenous racism

- Liaise with Region of Durham's Diversity, Equity and Inclusion (DEI) Office office
- Identify how to support the work already underway
- Develop a diversity, equity and inclusion lens for application in the CSWB Plan

7. Expand Searchable Program and Strategy Catalogue

Key partners:

- System Leaders
- Municipal Partners
- Region of Durham staff

Description and Key Tasks

Identify how to support the expansion of the searchable catalogue to meet regional need

- Secure budget
- Coordinate engagement activities to seek feedback on initial database strengths and areas of development
- Identify internal products that may be available to support the needs of the database or determine external partnerships if required

8. Build Future Phases for Implementation

Key partners:

- System Leaders
- Municipal Partners
- Region of Durham staff

Description and Key Tasks

Develop Work Plans for years two and three

Appendix B: Acknowledgements

The development of the Community Safety and Well-Being Plan in Durham Region was a collaborative effort.

“None of us is as smart as all of us” - Ken Blanchard, Author
